South Health Campus (SHC) – Intensive Care Unit (ICU)
12 bed unit

OPENING 2013 – The SHC ICU will focus on the critically ill medical/surgical patient who requires a high degree of specialized nursing and medical care. Patient diagnosis includes multisystem organ failure, renal dysfunction, cardiac disease, respiratory failure, gastrointestinal disease and surgical procedures requiring ICU care post operatively. Innovations at this new campus include Automated Dispensing Cabinets for medication administration, Smart IV pumps and a YMCA complete with wellness kitchen on site to help you maintain the important work life balance!

Peter Lougheed Centre (PLC) – ICU
19 bed unit

This ICU has a primary focus on critically ill medical and surgical patients, especially within the vascular and renal populations. Patient diagnosis includes multi-system organ failure, renal dysfunction, cardiac disease, respiratory failure, gastrointestinal disease and surgical procedures requiring ICU care post operatively.
**Foothills Medical Centre (FMC) – ICU**

**30 bed unit**

One of the largest and busiest critical care units in Alberta, FMC ICU is the regional tertiary referral centre supporting multiple clinical programs including trauma, burns, and neurocritical care for Southern Alberta. This 30 bed unit is located in a state of the art facility, and offers a broad case mix including medical and surgical emergencies, oncology and hematology.

---

**Rockyview General Hospital (RGH) – ICU & Coronary Care Unit (CCU)**

**17 bed unit**

Overlooking the beautiful Glenmore Reservoir, Rockyview Hospital has an enviable location and ambiance that benefits patients and staff alike. This unit is a 10 bed Intensive Care Unit whose primary focus is critically ill medical and surgical patients; and is unique in that it also includes a 7 bed Coronary Care Unit. Common patient diagnoses include respiratory failure, pneumonia, complications related to asthma, cardiac arrest, sepsis, renal and liver failure, complications of diabetes (DKA), pregnancy, shock, chest pain, MI, CHF and dysrhythmias.
Foothills Medical Centre – Cardiovascular Intensive Care Unit (CVICU)
14 bed unit

The FMC CVICU is a 12 bed post open heart surgery critical care unit. With a caseload of approximately 1000 surgeries per year, the CVICU focus is caring for patients in the immediate post operative phase of their recovery after open heart surgery. The CVICU also provides care for patients requiring Extracorporeal Life Support, Continuous Renal Replacement Therapy, Intra Aortic Balloon Pump therapy, and Ventricular Assist Devices. The CVICU has a dynamic multidisciplinary team which works collaboratively in a very fast paced environment.
