

Emergency Department Length of Stay for Admitted Patients

Measure Definition

The average patient's length of time (hours) in the emergency department before being admitted to a hospital bed at the busiest emergency departments. This is calculated as the median length of stay which means that 50 per cent of patients stay in the emergency department this length of time or less, before being admitted. This measure is the time between when a patient is assessed by a nurse in the emergency department until the time they are admitted.

Understanding this Measure

This measure reflects the performance of the entire system. It is influenced by our ability to manage complex patients in primary care, efficiencies in the emergency department, efficiencies and capacity in the acute care (when staying in hospital), better quality of care and integration with community services in reducing unplanned readmissions, timely placement of patients into continuing care (e.g., long-term care) and linking patients to the appropriate services in the community after a stay in hospital.

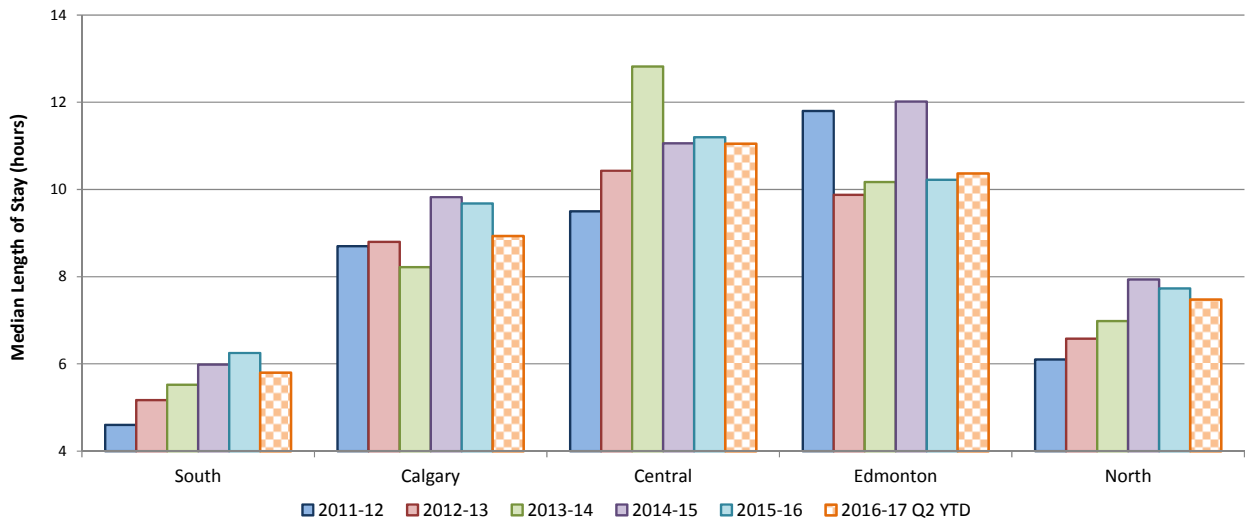

ED Length of Stay for Admitted Patients - Annual

How Do We Compare?

Alberta ranked 2nd best nationally out of five provinces in 2015-16.

ED Length of Stay for Admitted Patients - by Zone

ED Length of Stay for Admitted Patients

ACTIONS

CoACT implementation is underway in all zones which will demonstrate a positive impact on efficiency and emergency department (ED) flow.

The Emergency Strategic Clinical Network is developing a top five list of management decisions performed in EDs that could be reduced / avoided to assess the impact in reducing unnecessary tests / treatments.

South Zone continues to work with inpatient units on patient flow improvements to move patients into vacant inpatient beds when a bed becomes available.

Calgary Zone is opening a Mental Health Assessment Unit at Rockyview General Hospital to reduce the length of stay for admitted patients, particularly for those needing a short stay admission. Other initiatives to enhance patient flow between units and sites, and facilitate earlier discharges, include collaborating with mental health services, working with site management on inpatient units to reduce EIP (emergency inpatients) volumes, reviewing bed management processes, refining intake areas at all EDs and implementing discharge initiatives (e.g. 0900 on every unit and seven day/week discharges).

Central Zone is coordinating with acute hospital flow activities, CoACT, TeamCARE, Patient First, and Transition of Care initiatives to sustain and support a collaborative care model.

Edmonton Zone is working on optimizing the rapid transfer unit and medicine observation unit, improving inpatient discharge processes, implementing an ED surge trigger plan, optimizing surge protocol and EIP triggers, incorporating Emergency Disposition and Consult (EDC) physician role, improving physician consult times and eliminating 'consult bumping.'

North Zone has identified opportunities for length of stay efficiencies in inpatient units (ALOS/ELOS) to enhance flow from the emergency department including increasing Continuing Care Capacity in Boyle, Edson, High Prairie, and Grande Prairie (Mackenzie Place).

SUMMARY

Provincial, South, Calgary and North Zones achieved targets for Q2 YTD 2016-17. Central Zones improved from the same period as last year.

In Edmonton Zone, the deterioration in performance is due to increased ED volume, acuity and high admits through the ED. The zone is implementing an ED Surge Plan to improve the flow through the ED.

DID YOU KNOW

Other initiatives are underway including operationalizing in-progress bed movement process to move patients to vacant beds in a more timely fashion.

The Emergency Strategic Clinical Network is committed to developing and supporting a system-wide approach to the delivery of emergency care for Albertans that is appropriate, patient-focused, timely, safe, and aligned with quality standards. To achieve this, they work with a diverse group of people and clinical services to ensure they have input from all stakeholders.

ED Length of Stay for Admitted Patients

The average patient's length of time (hours) in the emergency department before being admitted to a hospital bed at the busiest emergency departments.
