

Satisfaction with Hospital Care

Measure Definition

This measure is the percentage of adults aged 18 years and older discharged from hospitals who rate their overall stay as 8, 9 or 10 out of 10, where zero is the lowest level of satisfaction possible and 10 is the best. This measures acceptability.

Understanding this Measure

Feedback gathered from individuals using hospital services is critical to improving the health system. This measure reflects patients' overall experience with their hospital care. Telephone interviews are conducted with a random sample of patients within six weeks of their discharge date from hospital. Source: Hospital-Consumer Assessment of Healthcare Providers and Systems (H-CAHPS) Survey. NOTE: This measure is reported a quarter later due to the requirement to follow up with patients after the end of the reporting quarter.

Satisfaction with Hospital Care - Annual

How Do We Compare?

Comparable national data is not available for this measure.

Satisfaction with Hospital Care - By Zone

Note: North Zone results have been impacted by the temporary closure of Northern Lights Regional Hospital and displacement in Fort McMurray due to the wildfires in Q1.

Satisfaction with Hospital Care

ACTIONS

The Patient First Strategy will enter the implementation phase across all five zones.

All five zones will complete Phase 1 CoACT elements and continue to implement Phase 2 elements to support patient flow and transitions from care settings across 20 sites. Elements include: integrated care suite, quality suite, transition rounds, patient scheduling, standard transition process, bed turn process, right bed, first time, home team, home unit, collaborative care team, collaborative care orientation, team charters and partnerships with support services.

South Zone is implementing the Patient First Strategy including patient engagement.

Calgary Zone is outlining the range of Family Presence Practices available and moving towards consistency across sites of Family Presence Practices.

Central Zone increased the number of patient advisors involved in acute care committees and other engagement activities as well as staff cultural sensitivity training.

Edmonton Zone implemented several initiatives at multiple sites including: patient focus practices of Name Occupation Duty (NOD); patient satisfaction evaluation process to improve the patient/family experience; new Patient Experience Office at the Royal Alexandra Hospital; actions to improve satisfaction with hospital care at the UAH including standardization of site-wide flexible visiting hours and conducting a patient experience project in Medicine focusing on improving the patient's experience with Over Capacity Protocol.

North Zone will develop an Always Events Change Management Plan to spread patient- and family-centred care best practice within the zone.

SUMMARY

The most recent data for this measure is a quarter behind. This analysis is based on Q1 2016-17.

Central Zone met the 2016-17 target in Q1. Provincial, Calgary, Edmonton and North Zones demonstrated improvement from the same period as last year.

DID YOU KNOW

Patient First Strategy reflects a patient- and family-centred care. The strategy will enable AHS to advance health care in Alberta by empowering and enabling Albertans to be at the centre of their health care team, improving their own health and wellness.

CoACT is an innovative model of care in which care provider teams collaborate more closely with patients. This provincial program designs tools and processes for Collaborative Care.

ALWAYS events refer to elements of the patient experience that are so vital to patients and families that healthcare providers should strive to ALWAYS get them right.

Satisfaction with Hospital Care

Percentage of adults aged 18 years and older discharged from hospitals who rate their overall stay as 8, 9 or 10 out of 10, where zero is the lowest level of satisfaction possible and 10 is the best.
