Curbside Consultation Case Study Submission Guide

Case Study Guidelines

Curbside Consultations are opportunities for peer to peer idea sharing around responsive behaviours and person-centred dementia care. The Appropriate Use of Antipsychotics (AUA) team organizes and facilitates discussions based on case studies submitted by Alberta continuing care teams.

1. You will be given the opportunity to present your own case study or the AUA Team can present on your behalf. Please protect the privacy and confidentiality of the resident; use language such as “a gentleman in his 90’s” or “a 52 year old lady with early onset dementia”.

2. Please arrange to be on the call when your case study is discussed so you can answer questions from participants. We recognize you have worked with this resident/issue for some time and have already tried many strategies.

3. We will attempt to respond to your case study with resources and/or a date for a Curbside Consultation.

4. Additional information may be requested for clarity after the AUA team reviews your case study.

Case Study Information

What you would like to tell us about the resident? Diagnoses, history of concern, information about their life, mood, likes, dislikes, etc.

What has your team tried?
   a) Person-centered interventions

   b) Site routines/environmental interventions

Is there a part of the problem you would like the group to focus on?

Medication List

Two options for sending the medication list:
   1. Scan/attach to email
   2. Type into the email body

<table>
