

Supervised consumption services in our community

Helping to save lives and build safer communities

Alberta Health Services has submitted an application to Health Canada to integrate supervised consumption services at the Sheldon M. Chumir Health Centre.

Supervised consumption services reduce harm from substance use while offering additional services such as counselling, social work, and opioid-dependency treatment.

To learn more about opportunities to share your perspectives or for more information about supervised consumption services, please email scs.calgary@ahs.ca or visit www.stopODs.ca
