ACKNOWLEDGEMENT

The Alberta Addiction & Mental Health Research Partnership Program (Research Partnership Program) was established in 2005 through a collaborative process. The implementation of the program was based on a thorough consultation that was led by the Research Partnership Committee. The intent of the partnership program is to increase research and its application in addiction and mental health services and in public and population health. They also have a focus on knowledge translation to assist with evidence informed addiction and mental health practice.

This document was produced on behalf of the Alberta Addiction & Mental Health Research Partnership Program through the efforts of Alberta Health Services, Provincial Addiction and Mental Health.

This report is considered a work-in-progress and represents information currently available. The purpose of this report is to provide mobile resources dealing with mental health and addiction-related issues for health care professionals and researchers. It is updated annually and mainly includes apps that have been released within the previous year.

Any omission or inaccuracy in this document is oversight and unintentional. Contents are current up to April, 2017. We invite you to comment, submit revisions and/or provide further information to us at researchpartnership@ahs.ca.

Disclaimer

The Alberta Addiction and Mental Health Research Partnership Program does not have any financial interests in any of the products listed in this document nor do they endorse the use of the mobile applications listed in this document. The privacy and security of the listed applications has not been independently verified. **No evaluations of the applications listed in this document have been done; it is intended for information purposes only.**

BACKGROUND

Information Provided in this Document
This document includes information about mobile applications (apps) related to addiction and mental health. It provides a directory of electronic resources for different mobile platforms which may be used as aids in mental health or addiction conditions.

The information in this report was gathered and collated from various organizational websites and other information sources in the public domain. The information represents a brief cross-section of current apps related to addiction and mental health available for the general mobile device user. Apps have been grouped into categories of disorders according to the Diagnostic and Statistical Manual of Mental Disorders 5 (DSM 5)\(^1\). These categories are not mutually exclusive.

Intended Audience
This is a comprehensive document that provides a representation of the current apps available which are related to addiction and mental health and is current up to April, 2017.

This app directory is divided into various categories pertaining to different mental health or addiction disorders. It may be useful for:

» clinicians looking for information about apps related to mental health or addiction
» clinicians looking for electronic technologies to supplement care
» researchers interested in learning about mobile health technology
» electronic application developers in identifying gaps in the current app market

It is hoped that this directory will increase awareness of current addiction and mental health apps and be a useful resource. Further evaluation and clinical judgement is encouraged prior to recommending apps for patient use.

Search and Selection
A comprehensive search for apps was conducted in Google and academic databases (e.g., MEDLINE, PsycINFO). Apps were also identified from organizational websites, news articles, and other information sources in the public domain.

Due to the deluge of health apps, it can be a challenge to identify apps that are user friendly and clinically effective. Although we do not personally download and evaluate the apps, we strive to include apps that have supporting evidence (e.g., academic articles, expert reviews). When supporting evidence has been identified, a link to the source is provided. We recommend that potential users of the listed apps personally evaluate app quality before use. Users may find the Mobile App Rating Scale (MARS) and the American Psychiatric Association’s App Evaluation Model useful tools in this regard.

Health app research is a burgeoning field of study. We hope that eventually we will be able to provide supporting evidence for all the apps in the Directory.

REPORT FORMAT
For consistency, information is provided in a standard format throughout this report. The mobile applications (apps) have been divided into categories based on their intended addiction or mental health use.

MAJOR APP CATEGORY

Specific App Category

App Name
Developer (Year of last update)
Cost*

Summary of the main features of app.

Link to expert review or supporting evidence (if available)

Platforms (iOS, Android)
Link to app

*Cost Legend:
  » Free
  » $ = $1.00-$5.99
  » $$ = $6.00-$10.99
  » $$$ = $11.00-$20.99
  » $$$$ = $21.00-$50.00
  » $$$$$ = >$50.00

Note: While some apps are listed as Free, they might also have ‘in-app’ add-ons that may have a cost associated with them.
# 1.0 Neurodevelopmental Disorders

## 1.1 Communication Disorders & Autism Spectrum Disorders

1.2 Attention-Deficit/Hyperactivity Disorder

**ADHD Treatment**  
*Kfirapps Limited (2017)*  
$$
Made for both children and adults, this app is designed to help strengthen cognitive skills and executive function through neurocognitive therapy.

iOS  

---

**30/30**  
*Binary Hammer (2014)*  
Free

Helps users manage tasks. Provides information about planning, time estimation, self-monitoring, and social behaviors.

iOS  

---

2.0 Substance-Related Disorders and Addictive Disorders

2.1 Alcohol-Related Disorders

**AlcoDroid Alcohol Tracker**  
*Myrecek (2017)*  
Free

Tracks alcohol consumption, helps users maintain a drink diary, and calculates blood alcohol content. Allows users to monitor drinking habits and set goals.

Android  
Nomo – Sobriety Clocks
Parker Stech (2017)
Free
Monitors sobriety time, provides ‘chip’ awards for recovery milestones, and tracks money saved over time.

Expert review

iOS, Android

Saying When: How to Quit Drinking or Cut Down
Centre for Addiction and Mental Health (CAMH) (2016)
Free
Includes a variety of tools to help decrease drinking. Users complete a self-assessment and create personalized goals. Coping strategies and a drink tracker are also included.

Expert review
