

Improving Care in Diagnostic Imaging

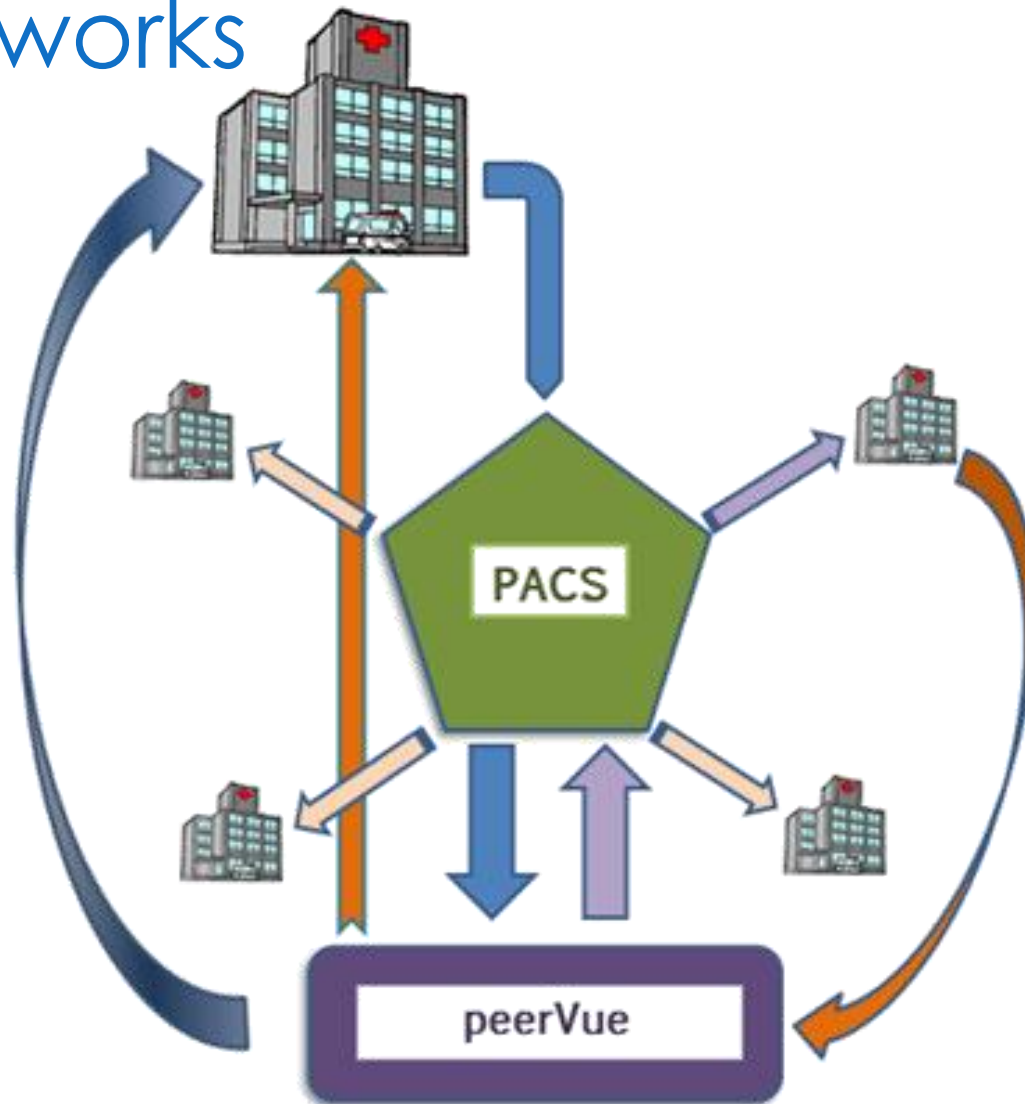

October 25, 2016

The beginning...

- Health Minister calls for a thorough examination of quality assurance processes
- Quality Assurance Program framework is developed
- Goal of reducing errors and improving patient outcomes
- Focus on education

How it works

Pilot & Implementation

- Five Zones
- Re-evaluation post pilot
- Multiple training methods
- Visited over 120 sites during implementation

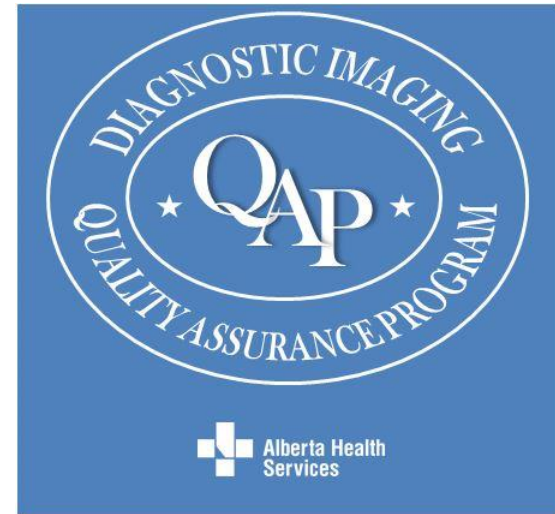

Outcomes & Benefits

- ~1,400 technologists
- Over 300 radiologists
- Over 55, 000 reviews
- One of the world's largest diagnostic imaging peer learning programs
- One of the first peer learning programs to include technologists

THANK YOU!
