

ROCKYVIEW INDUCTION OF LABOUR QUALITY IMPROVEMENT PROJECT

Wynne I. Leung MD FRCSC^{1,2}, Leila Jackson RN BN², Heather Bensler RN
MSN^{2,3}, Lorna Spitzke RN BN²

M. Brad Sullivan MD MSc⁴, Kirk Stephanson BSc¹, Selphee Tang BSc¹

1. Department of Obstetrics and Gynecology University of Calgary 2. Rockyview Hospital 3. Department of Nursing
Mount Royal University 4. Department of Obstetrics and Gynecology University of Alberta

PROJECT PLAN

- **Phase I:** prospective root causes analysis of all inductions for 2 month period at RGH.
- **Phase II:** Dispersement of data analysis and solicitation of feedback from stakeholders. Communication of recommendations to staff and implementation of improved procedures
- **Phase III:** Prospective Audit of 2 months induction at RGH. Documentation of effectiveness of change in process. Report back to Calgary Zone Quality Council.

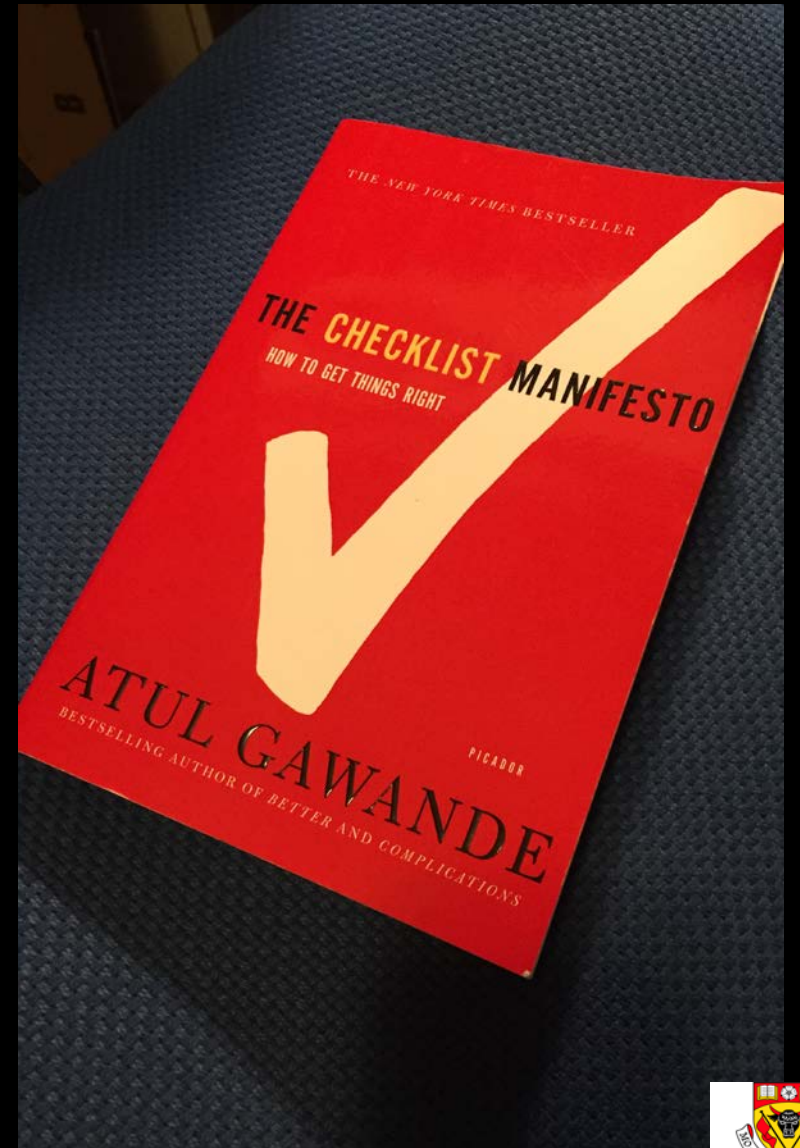

STATED GOALS

1. 90% reduction in inductions booked for non SOGC recommended indications.
2. 50% improvement of adherence to Induction Protocol.
3. 5% reduction in inductions resulting in Cesarean Sections.
4. 10% improvement in patient satisfaction scores.

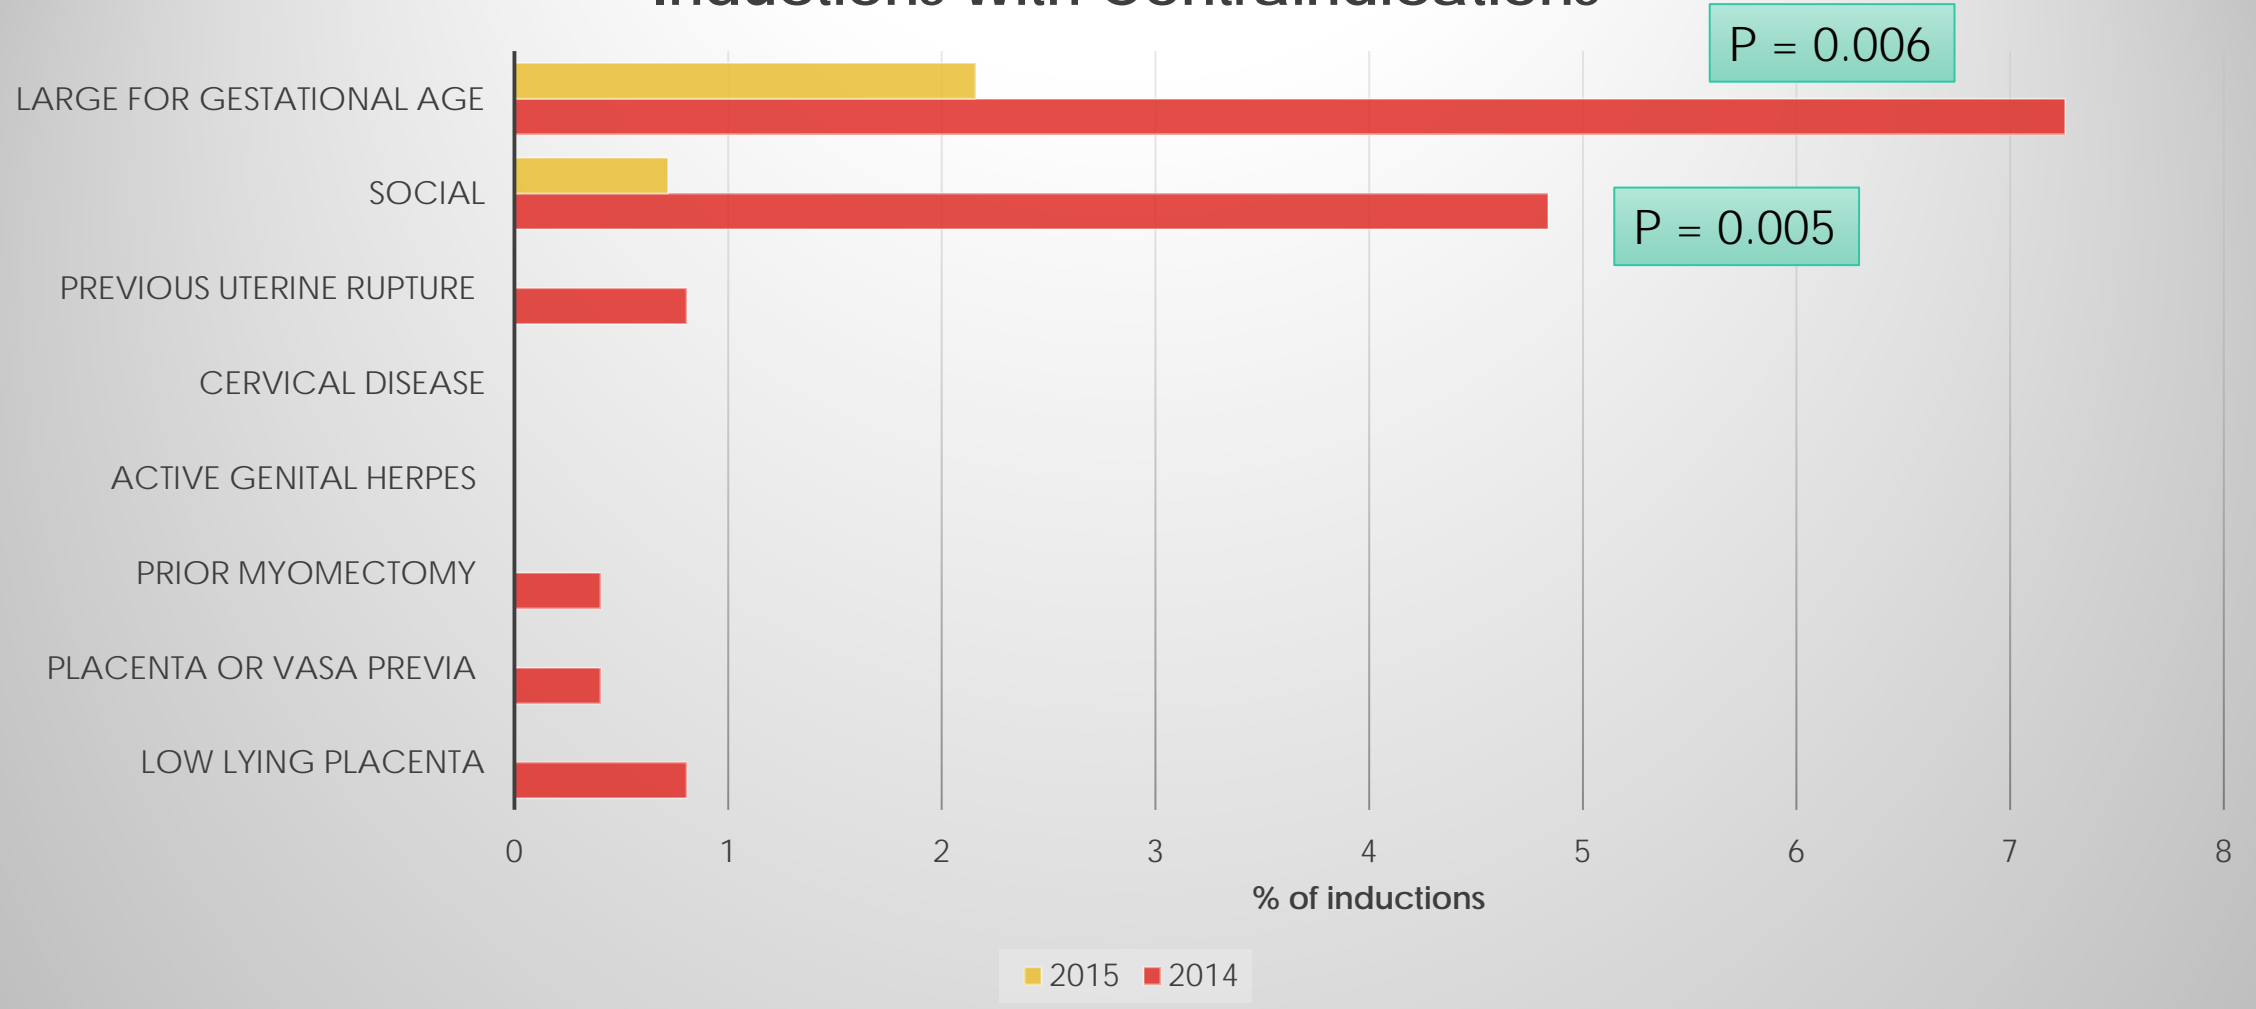

“Childbirth is a complex process with serious and all-too-frequent consequences.”

“In other complex processes with potentially grave consequences (such as flying an airplane..)research has proven that checklists can save lives and prevent serious harm.”

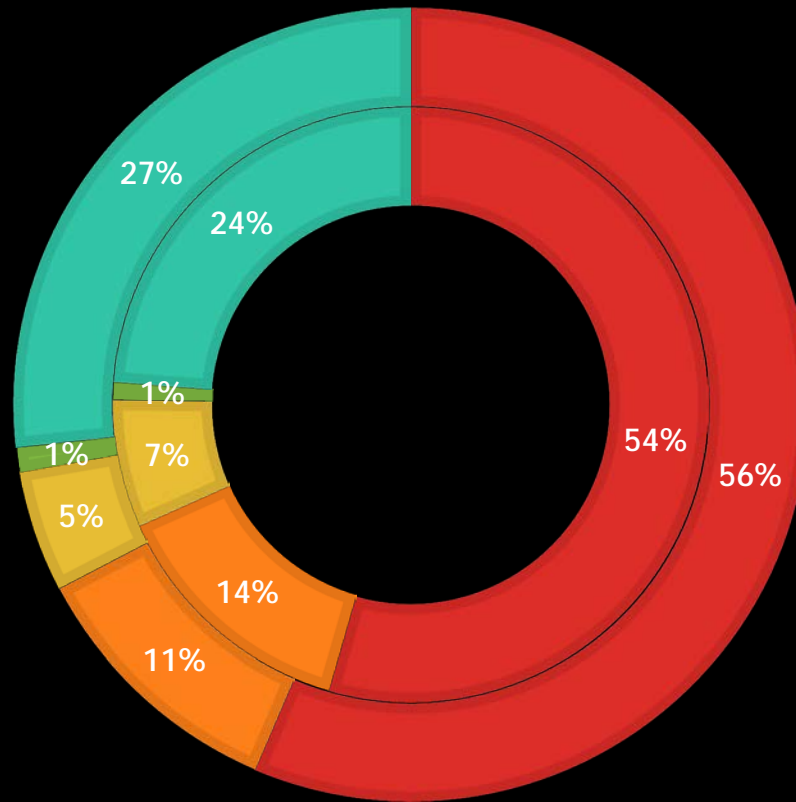

Inductions With Contraindications

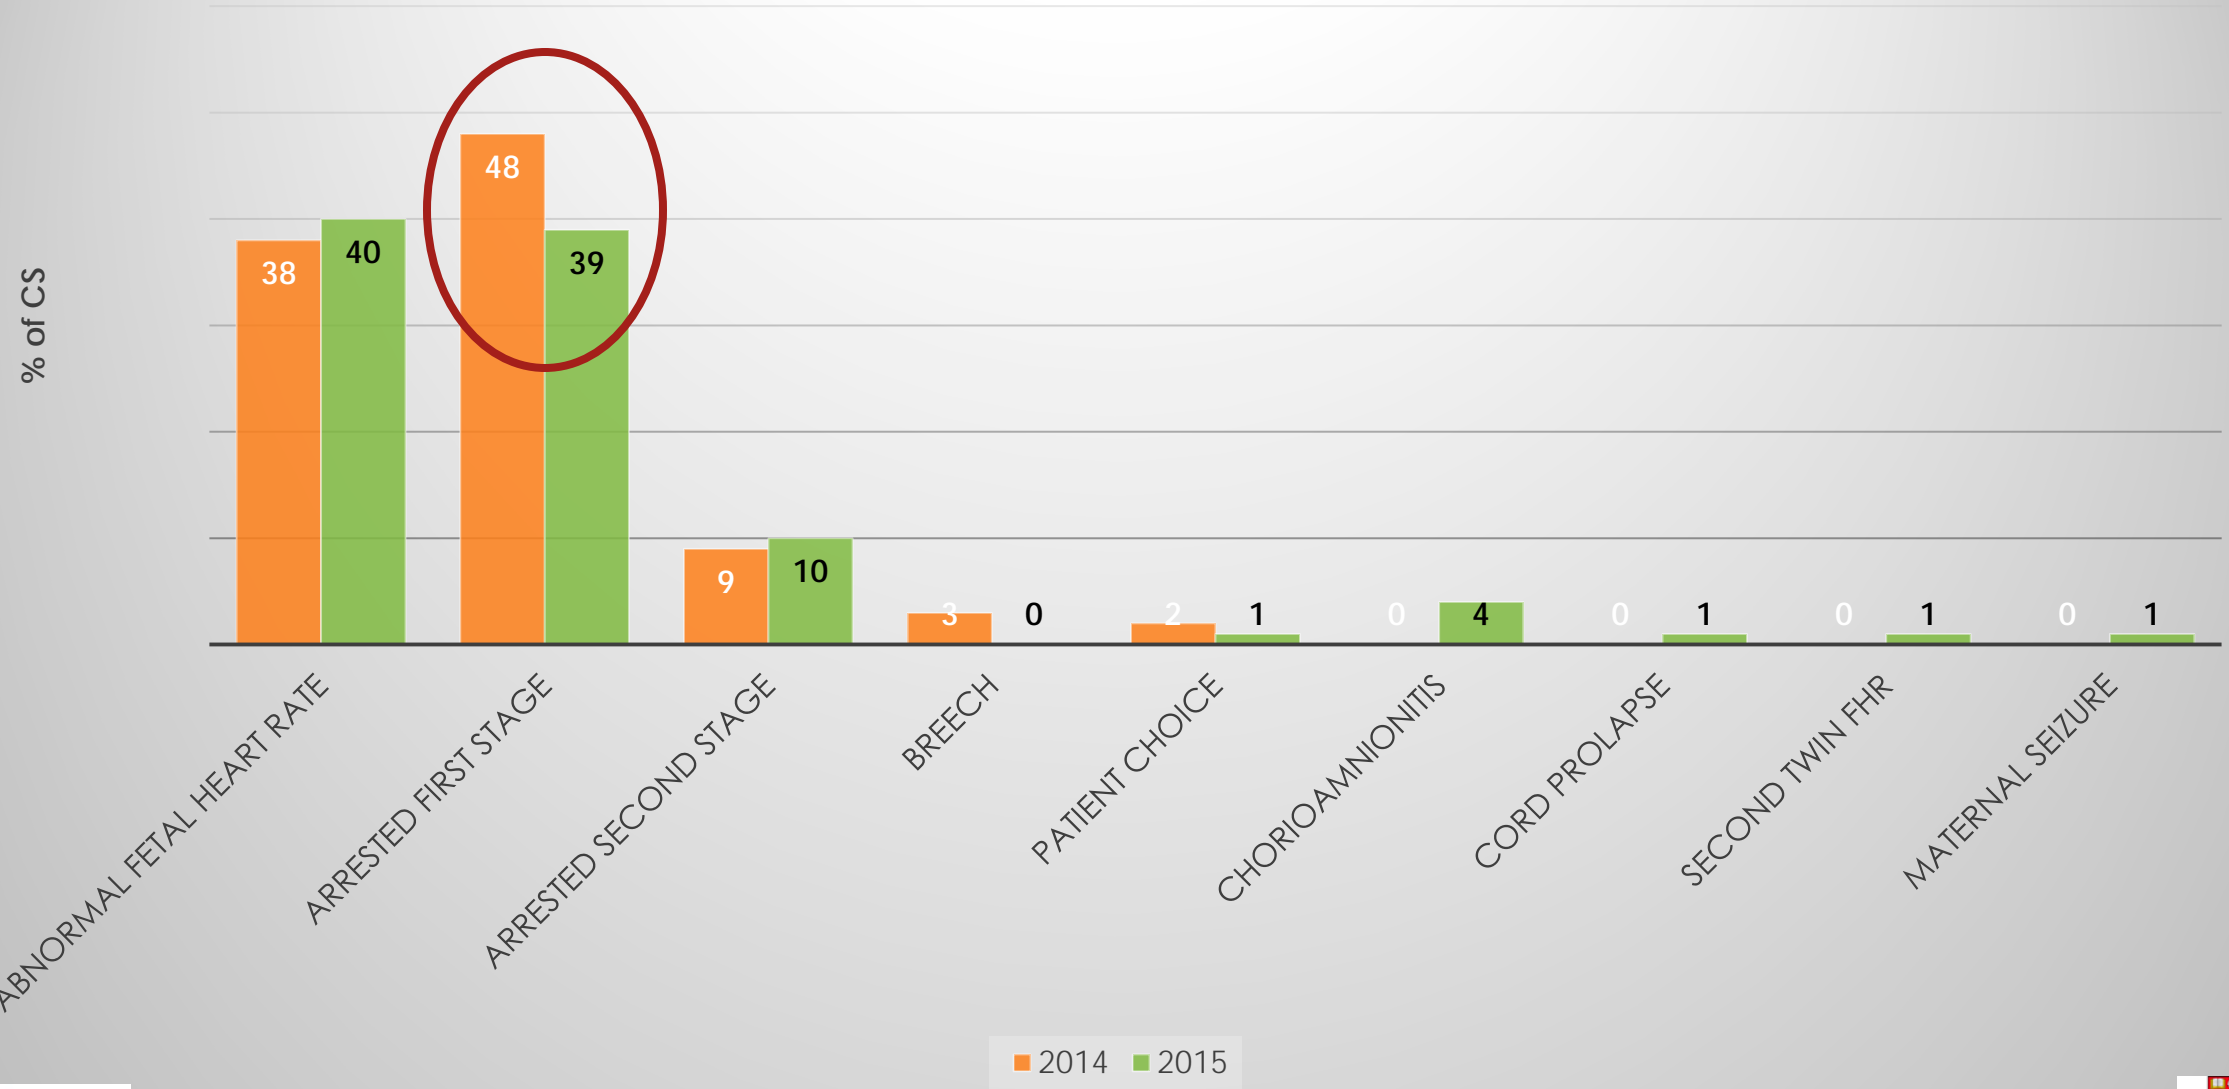

COMPARISON OF DELIVERY TYPE

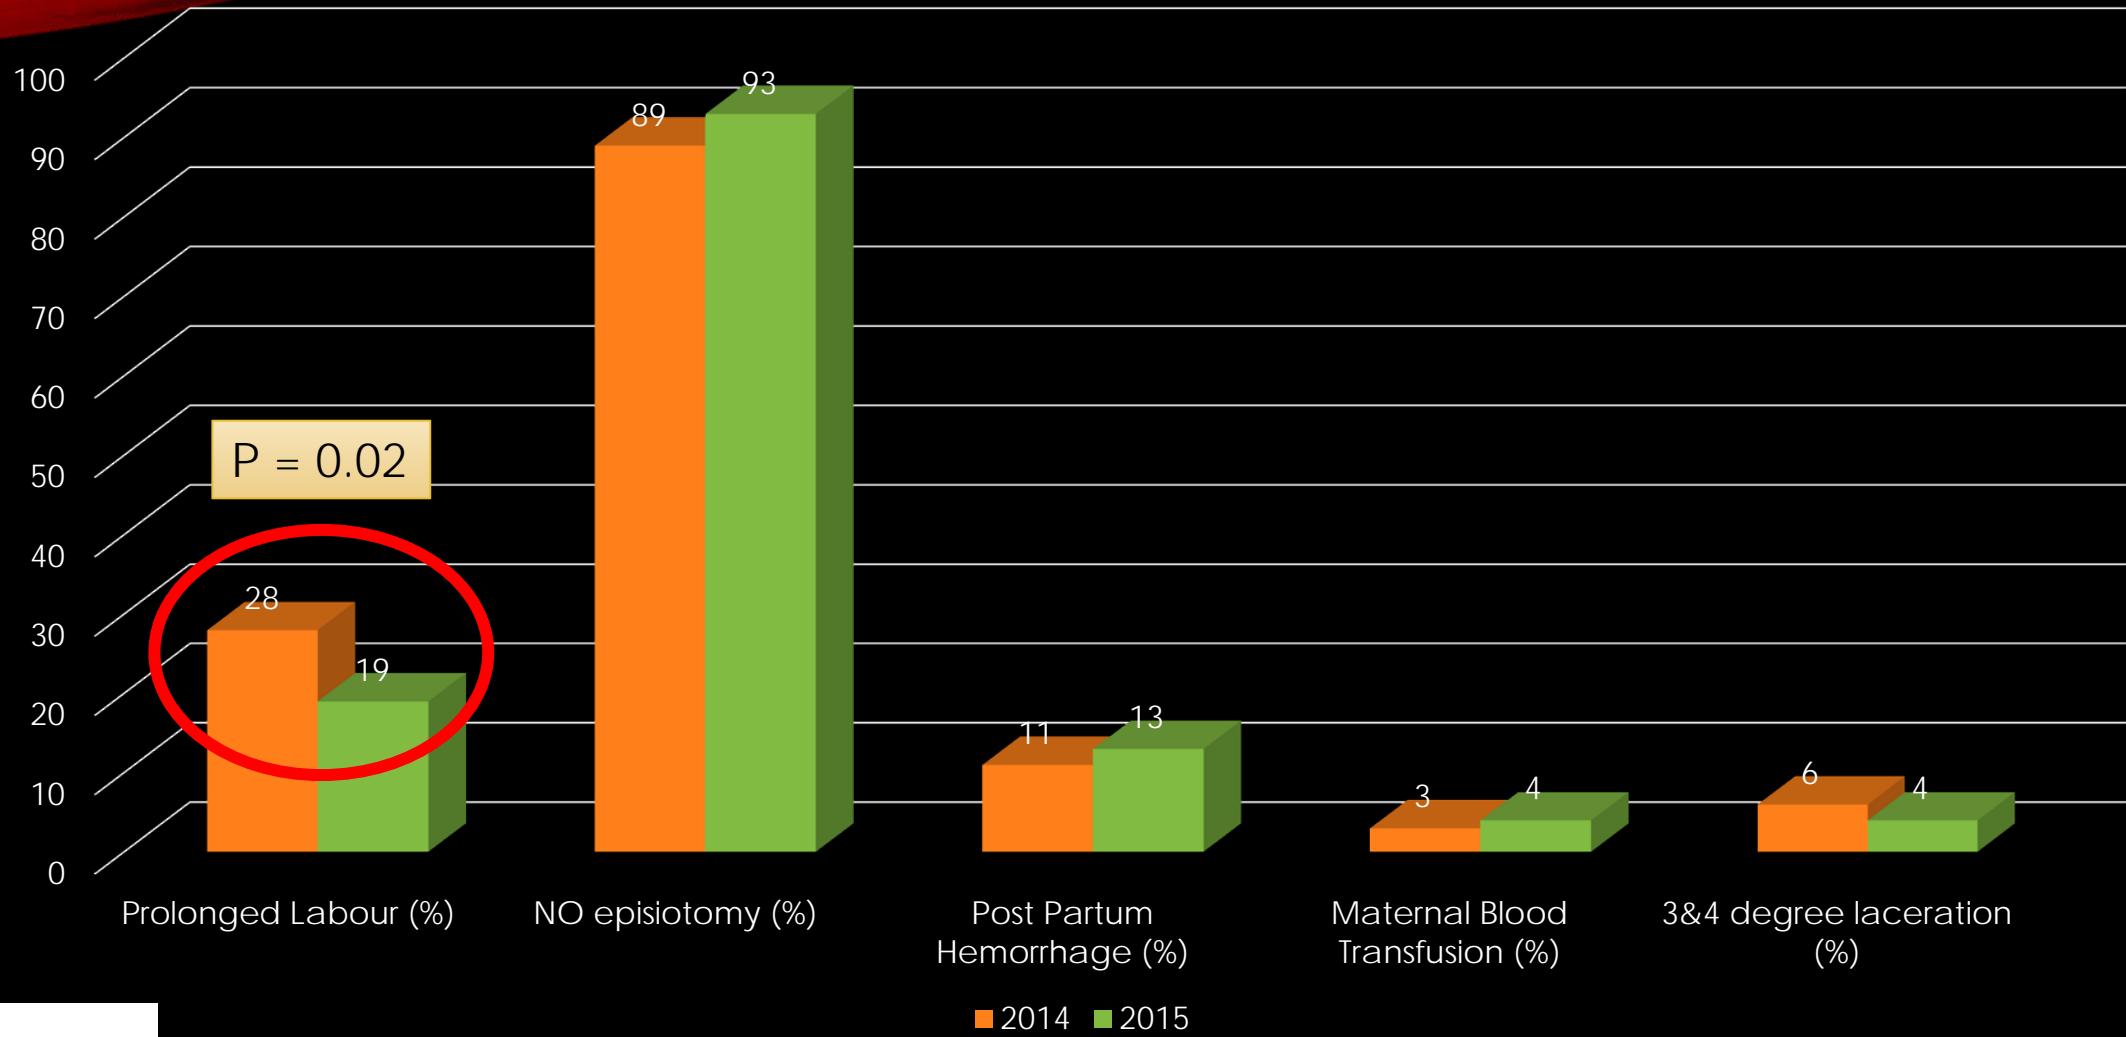

■ Spontaneous Vaginal ■ Vacuum ■ Forceps ■ Forceps w/rotation ■ Cesarean

Comparison of Indications for CS

Delivery Outcomes
