## Pertussis data for 2016 to date

### FIGURE A\*:

#### Pertussis Disease Rate, per 100,000

##### 2016 to date:

Alberta:	6.59/100,000
South Zone:	16.63/100,000
Calgary Zone:	4.34/100,000
Central Zone:	17.58/100,000
Edmonton:	2.74/100,000
North:	7.43/100,000

### FIGURE B:

#### Immunization History of Cases (per cent)

##### 2016 to date:

Zone	Unimmunized	Under-immunized for age
South	45%	33%
Calgary	50%	23%
Central	34%	27%
Edmonton	41%	16%
North	65%	11%

\* Please note: There are no pertussis outbreaks active in any Zone of Alberta Health Services (AHS) at this time. The expansion of the immunization program in AHS' Central Zone and South Zone, announced by AHS on Nov. 1, is due to sustained high rates of pertussis disease, as illustrated in Figure A.
