## Pertussis data for 2016 to date

FIGURE A\*:

Pertussis Disease Rate, per 100,000

2016 to date:

Alberta: 6.59/100,000 South Zone: 16.63/100,000 Calgary Zone: 4.34/100,000 Central Zone: 17.58/100,000 Edmonton: 2.74/100,000 North: 7.43/100,000

FIGURE B:

**Immunization History of Cases (per cent)** 

2016 to date:

Zone	Unimmunized	Under- immunized for age
South	45%	33%
Calgary	50%	23%
Central	34%	27%
Edmonton	41%	16%
North	65%	11%

<sup>\*</sup> Please note: There are no pertussis outbreaks active in any Zone of Alberta Health Services (AHS) at this time. The expansion of the immunization program in AHS' Central Zone and South Zone, announced by AHS on Nov. 1, is due to sustained high rates of pertussis disease, as illustrated in Figure A.
