RE:	Alberta Precision Laboratories Acute Laboratory Requisition

PLEASE POST OR DISTRIBUTE AS WIDELY AS APPROPRIATE

Key Message

- The provincially standardized Alberta Precision Laboratories (APL) [Acute Laboratory Requisition](#) (Form #21647) is now available for use.
- This requisition is intended for use in Acute Care settings, including Emergency Rooms, in situations where a hard copy requisition is required.
- The Acute Laboratory Requisition is used as the Connect Care Downtime Requisition.

How this will impact you

- The Acute Laboratory Requisition is to be used in place of the [General Laboratory](#) requisition in Acute Care settings.
- Connect Care Downtime resources have been updated to include the Acute Laboratory Requisition.
- Hospitals currently using the STAT Requisition (CH-0022) may continue to do so until implementation of Connect Care in Wave 4.
- Hospitals currently using the Calgary Acute Care requisition (REQ9011RRL) will transition to the APL Acute Laboratory Requisition as the current requisition supply is depleted.

Questions/Concerns

- Terri Croisetièrè, Manager – APL Quality and Safety terri.croisetièrè@aplabs.ca
- Mona Mayan, Team Lead – APL Quality Management System mona.mayan@aplabs.ca
