

December 15, 2016

Dear Patient,

Your healthcare provider has asked for a FIT home stool test. The FIT is a colorectal cancer screening test that checks for hidden blood in your stool. .

The information on your requisition shows that you fall outside the recommended age group of 40 to 84 years of age. This means that you will not need to do a FIT collection today.

Please speak with the healthcare provider who ordered the test if you have questions or concerns.

To learn more about colorectal cancer screening visit screeningforlife.ca or call Health Link at 8-1-1.

Sincerely,

A handwritten signature in blue ink, appearing to read "C O'Hara".

Dr. Carolyn O'Hara, MD FRCPC
Interim Medical Director
AHS Laboratory Services
