Re: Rescinding H1N1 Pandemic 2009 Document:
Pandemic H1N1 (2009) Human Resources Manual (November 12, 2009)

As part of the business recovery process in the post-Pandemic period, Human Resources rescinded the above referenced document, effective January 25th, 2009. It is no longer accessible on the AHS Pandemic website.

The Pandemic H1N1 (2009) Human Resources Manual was developed as a reference document to address the recruitment, orientation, training, scheduling and deployment issues which arose during the Pandemic response. The document will be revised and updated for future use, but the guidelines and directives it contains are not applicable to daily AHS operations.

Please circulate this information to the Directors and Managers in your areas of accountability and ensure that, if they have not done so already, they revert to normal (pre-Pandemic) human resource practices.

Thank you for your support.
