Blue-green algae advisory lifted for Gull Lake

RED DEER – Monitoring has indicated that blue-green algae are no longer present in the waters of Gull Lake.

As such, effective immediately, Alberta Health Services has lifted the blue green algae advisory currently in place for Gull Lake. Advisory signage previously posted around this lake has been removed.

Alberta Health Services is the provincial health authority responsible for planning and delivering health supports and services for more than 3.9 million adults and children living in Alberta. Its mission is to provide a patient-focused, quality health system that is accessible and sustainable for all Albertans.
