

The ***Bone & Joint Health Strategic Clinical Network*** and
the ***McCaig Institute for Bone & Joint Health***
are pleased to announce the **recipients** of the

Translational Impact Grant

in musculoskeletal health

Principal Investigator: Dr. Leigh Gabel

Co-Investigators: Dr. Emma Billington,
Dr. Lauren Burt

Project Title: Strength training for
osteoporosis prevention in early
menopause (STOM-EM): a pilot study

Principal Investigator: Dr. Breda Eubank

Co-Investigators: Dr. Nicholas Mohtadi,
Dr. Tyler Williamson

Project Title: MACHine learning to develop
diagnostic algorithms for traumatic soft
tissue KNEE injuries (MAP KNEE)

The Translational Impact Funding Competition is intended to foster the development of translational research programs led by new or mid-career researchers, that have the potential to make a significant impact on musculoskeletal health and are ready for clinical or commercial viability testing (see Step 2 in the AHS innovation pipeline).
