Community Update:

Calgary Centre for Child and Adolescent Mental Health

Overview

- The \$39 million Calgary Centre for Child and Adolescent Mental Health (CCAMH) project is being built in partnership between Alberta Health Services (AHS) and the Alberta Children's Hospital Foundation (ACHF).
- The ACHF has raised more than \$50 million to fund construction of the centre, along with program and research enhancements.
- Once built, the new facility will provide community-based mental health services to help ensure mentally healthy futures for children and adolescents in our community.
- The centre will provide young people with new and enhanced services, including a walk-in clinic with specialized triage and the opportunity for immediate referrals to onsite programs. These community-based services will provide youth and their families with care designed to stabilize and manage escalating illness and, ideally, prevent hospitalization.
- In addition to the walk-in clinic, the three-storey, 3300sq.-m facility will also offer an intensive treatment program and a day hospital. The facility's services will augment and integrate with existing services provided by AHS and community-based agencies.

Construction update

- Foundation and slab on grade pours are complete.
- Weeping tile, radon membrane and underground plumbing completed.
- Waterproofing is ongoing.
- Bulk excavation, removal of soil, for the building interior is now complete.
- Sump pit installation complete.
