

Community Update:

Grande Prairie Regional Hospital

Overview

- The new 64,000 m² Grande Prairie Regional Hospital will provide a wide-range of healthcare services, including surgery, cancer care, critical care and emergency services.
- It will have single inpatient rooms, including medical, surgical and rehabilitation, intensive care, cardiac care, obstetrics, neonatal intensive care and pediatric beds.
- The hospital will include an education facility in partnership with Grande Prairie Regional College, for the training of nurses and other healthcare professionals.
- A state-of-the-art cancer centre at the new hospital will include two radiation vaults, bringing radiation therapy services to the community and the surrounding region.
- Outpatient programs will include specialized diagnostic procedures and clinics, medical day care, and a cardiac/respiratory program which will provide localized testing and treatment for patients with cardiac and respiratory diseases.
- The new hospital will also have a new five story parkade currently underway and led by Alberta Health Services.

Construction update

- The building envelope and shell work, which includes insulation, the roof and all of the windows, has been completed.
- Construction on the inside of the building, including wall-framing, drywalling, mechanical, piping and electrical areas is 70 per cent complete. Work will continue through the coming months.
- Work on the parkade is well underway. The pilings are in place and pre-cast panels have been installed up to the third floor. Work on the pedway, that will connect the parkade to the hospital, is currently underway.

What's to come

- Summer 2018: Landscaping work is underway and is anticipated to be completed later this summer. Interior work, including building office spaces in the parkade, is scheduled to begin late summer of 2018.
- Spring 2019: Paving and exterior work to begin spring of 2019.
- Summer 2019: The parkade is scheduled to be complete late summer 2019.
