

Targeting Improvements for Breast Health

Together with CancerControl Alberta, we are:

- Reducing time between diagnosis and surgical consult
- Increasing proportion of same-day mastectomies
- Improving surgical coordination for breast reconstruction
- Streamlining genetic testing for hereditary cancers (Mainstreaming)
- Enhancing navigation after diagnosis

How Albertans will benefit:

- Improved health outcomes, patient experiences, earlier cancer diagnosis and coordinated care
- Better access to information

How we're achieving it:

- Standardized patient education and clinical pathways
- Measurement and reporting for ongoing quality improvement
- Collaborations with patients, primary care, Alberta Society of Radiology, surgeons, and oncologists

Alberta's End-to-End Breast Health Clinical Pathway
