

MetaVision Charting Updates

PAIN ASSESSMENT – BUTTON (ADULTS AND PEDIATRIC)

The screenshot shows the MetaVision interface with the 'Pain' button highlighted by a red circle in the top toolbar. The interface includes various tabs like 'Vital Signs', 'Pain', 'Weight', 'Intake and Output', etc., and a main charting area with a timeline and data points.

Provincial practice expectation: Assess and document pain q4h and prn

RASS – UNABLE TO ASSESS (ADULTS)

The screenshot shows the 'RASS and Spontaneous Awakening Trial' charting interface. It includes a timeline for 'Last 24 hours' with data points for 'RASS' and 'Spontaneous Awakening Trial'. The interface also has sections for 'Goal RASS', 'Spontaneous Awakening Trial', and 'Patient Eligibility'.

Provincial practice expectation: Assess and document agitation and sedation Q4hr and PRN

ROUNDS CHECKLIST - ADULTS

The screenshot shows the 'Rounds Checklist - Adults' interface. It includes a 'Patient Rounds' section with a 'Most Responsible' field (Zygun David MD) and a 'Rounds Discussion Checklist' with various checkboxes for assessment and management. A 'Patient Rounds' dialog box is also visible, showing 'Add New Clinical Event' options.

Provincial practice expectation: The interdisciplinary team discusses bundle elements/strategies on a daily basis. “Every patient every time”

PAIN – UNABLE TO ASSESS (ADULTS AND PEDIATRIC)

The screenshot shows the 'Pain' charting interface. It includes a timeline for 'Previous and current day' with data points for 'Pain'. A note at the bottom states 'Denies Pain or Unable to Assess'. The interface also has a 'Comment' field and 'Save' buttons.

Provincial practice expectation: Assess and document pain q4h and prn

SBS/DELIRIUM COMBINED FORM (PEDIATRICS)

The screenshot shows the 'PED_SBS / Cornell Combined' charting interface. It includes a timeline for 'Previous and current day' with data points for 'SBS' and 'Delirium'. The interface also has sections for 'State Behavioural Scale', 'CAPD Required', and 'Non Pharmacological Interventions'.

Provincial practice expectation: Assess and document agitation and sedation Q4hr and PRN, assess for delirium q12h and PRN

ROUNDS CHECKLIST - PEDS

The screenshot shows the 'Rounds Checklist - Peds' interface. It includes a 'Patient Rounds' section with a 'Most Responsible' field (Doughty Paul MD) and a 'Rounds Discussion Checklist' with various checkboxes for assessment and management. A 'Patient Rounds' dialog box is also visible, showing 'Add New Clinical Event' options.

Provincial practice expectation: The interdisciplinary team discusses bundle elements/strategies on a daily basis. “Every patient every time”
