

## THE PAST

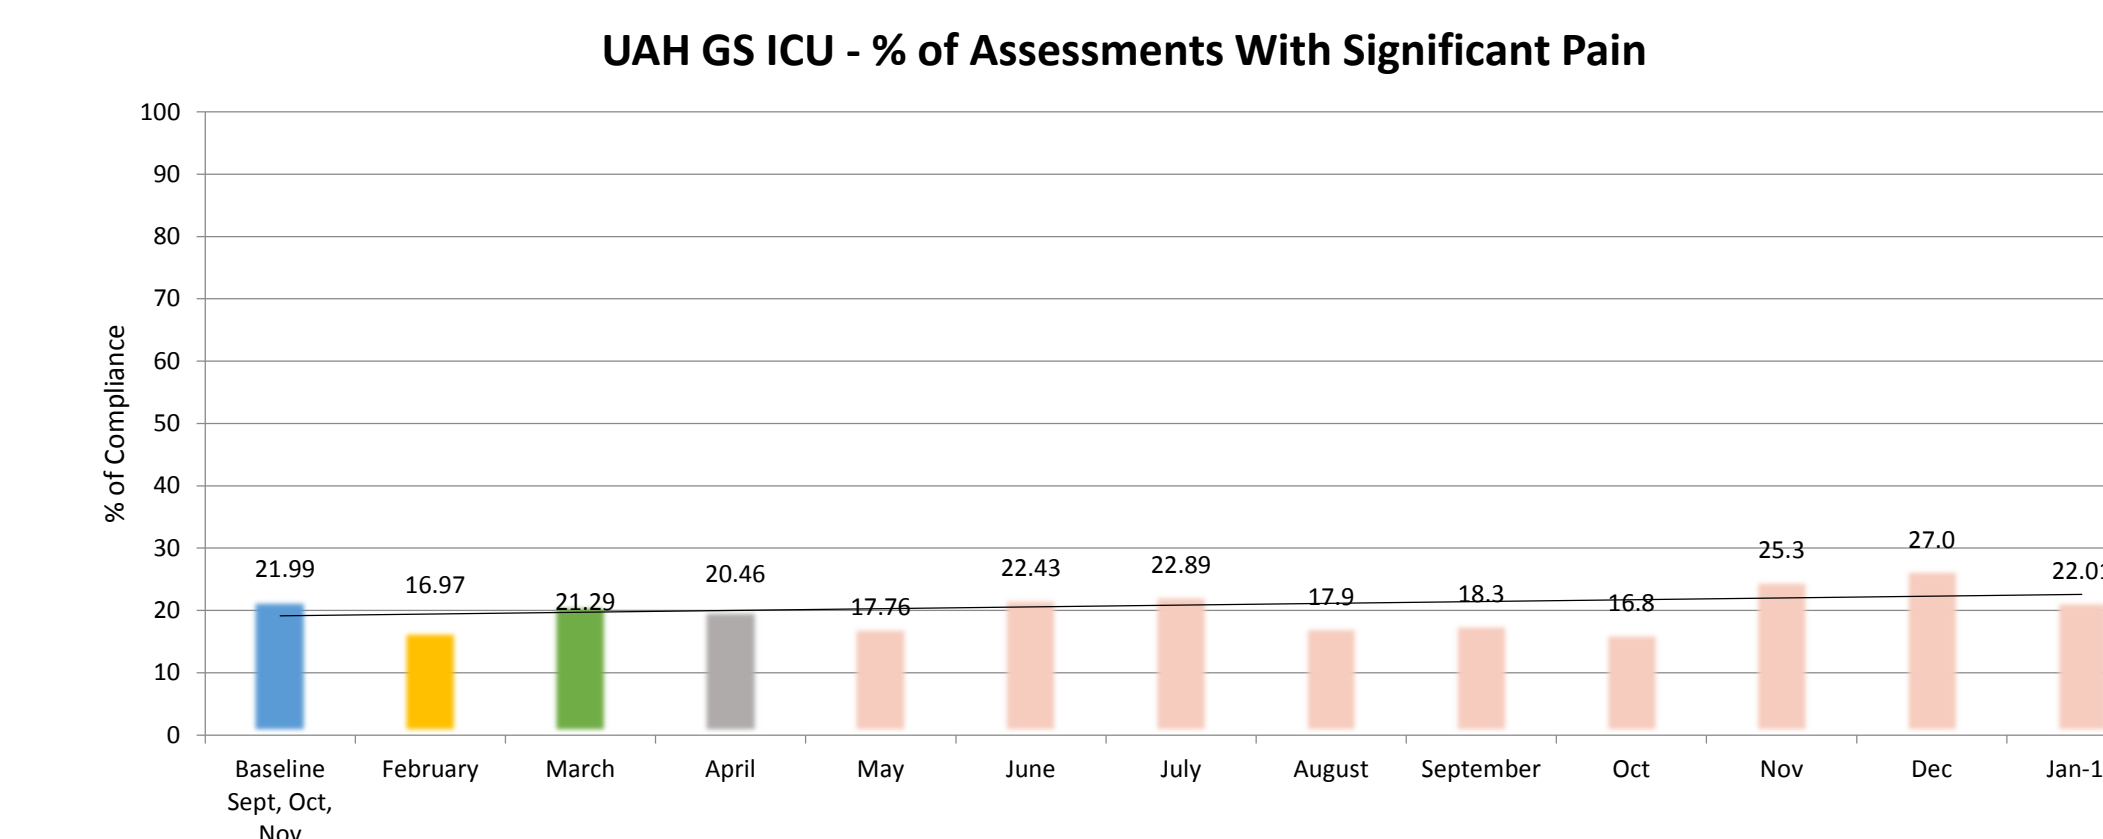

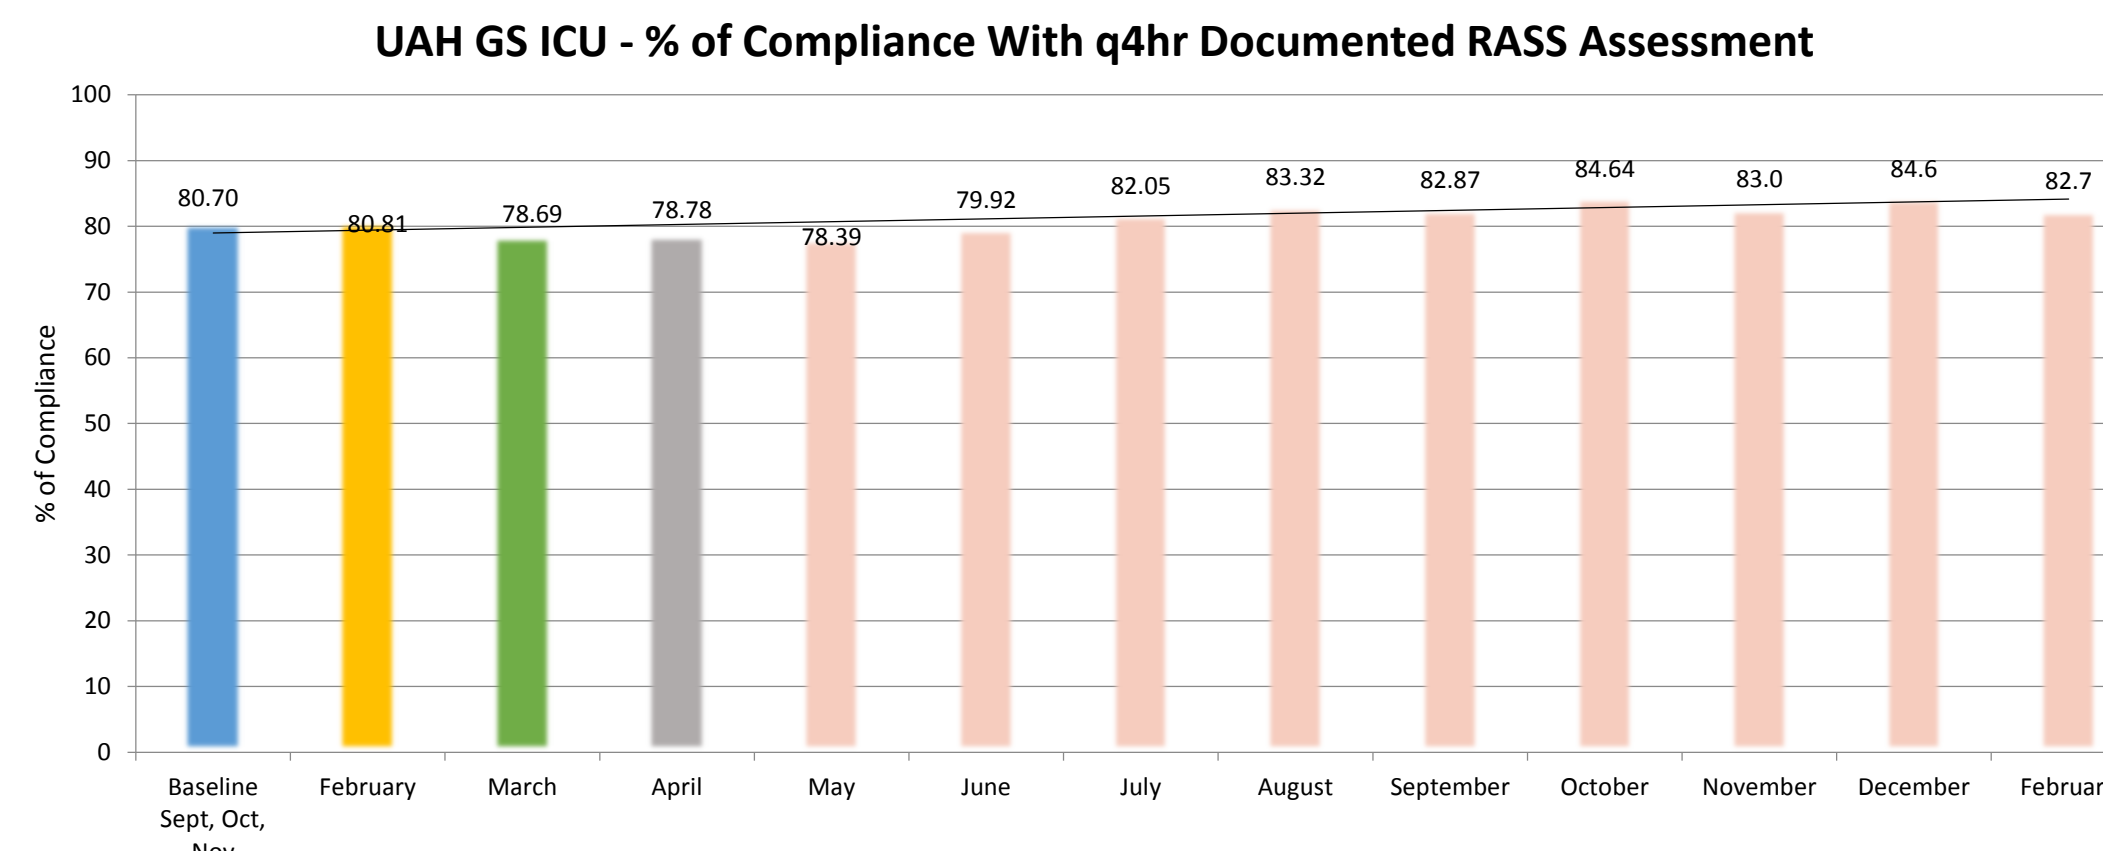

### Gaps in practice:

- Pain assessments not captured q4h
- No RASS target and orders
- Overuse of analgesia and/or sedation infusions

## OUR UNIT DELIRIUM TEAM

Dr. Djogovic	Samantha Taylor
Dr. Rex Townsend	Jessica Hulleman
Kelly Robinson	Salima Ismail
Jacinthe Ly Dang	Paula Roberts
Helen Doody	Laverne Gallagher
Chris Tham	

## THE PRESENT

### SBT – 2 week Baseline Data: Room to improve!

Average Total vents per day per team 4.16 (3 RT teams in ICU. Each team has ~ 8 patients)  
 Average #eligible patients for SBT per team per day: 2.1  
 Average patients that got weaning numbers per team per day: 1.3  
 Average # patients extubated per day per team: 1.3  
 Average # patients on a spontaneous mode already in the morning per day per team: 1.2

## THE FUTURE

- Pain, agitation & delirium as a Quality Council agenda item:
  - Program
  - Unit
- Implementation of SBT protocol and standardization **(New)**
- Promote patient mobilization
- Meet with Physician group and Fellows to discuss ABCDEF Bundle and initiatives
  - Sharing the data in a meaningful way
  - Ensure we all understand what the scoring tools mean (ICDSC, pain scores, RASS)

### We commit to de-adopt:

Decrease of antipsychotics to treat delirium

### We will adopt:

Patient and Family Centered Care Initiatives: White boards, delirium pamphlet for families, etc.)
