

2017-2018 Canadian Critical Care Trials Group (CCCTG)–Critical Care SCN Research Fellowship

About the Research Fellowship

The Fellowship Award program provides support for highly qualified candidates in the areas of critical care that are relevant to the CCCTG at the post-PhD degree or the post-health professional degree stages to add to their experience by engaging in health research in Canada.

As funding permits, the total amount available for this funding opportunity is \$100,000 over two years. The CCCTG hopes to provide up to two Fellowship awards.

The Critical Care Strategic Clinical Network (CC SCN), Alberta Health Services, is collaborating with the CCCTG to build research capacity in Alberta. The CC SCN will contribute matched-funds to successful applicants to conduct their training at an institution in the Province of Alberta with the maximum amount of half a single award. The total amount available from CC SCN is \$50,000. Preference will be given to applicants initiating new research programs.
