

Medicine Strategic Clinical Network™ Patient and Family Advisory Council

The Patient and Family Advisory Council (PFAC) of the Medicine Strategic Clinical Network (SCN) provides a forum for collaboration between patients, family advisors, and project leads in the planning and delivery of safe, quality healthcare services for all Albertans. The Council reports to and supports the work of the Medicine SCN and welcomes all patient and family advisors participating across the Medicine SCN.

- The Council consists of approximately 15 volunteer patient partners and caregivers from across Alberta, representing each of the Hospital Medicine, the Kidney Health, and the Respiratory Health Sections of the Medicine SCN.
- Council members bring a richness of diversity and perspectives, based on geography, age, gender, background, and culture. The patient and family advisors also draw from their personal health experiences to help shape the work of the Medicine SCN.

For more information on PFAC please contact: MedicineSCN@albertahealthservices.ca
