Table 4 – Monitoring Indicators

Table 4: Comparable child and youth indicators available on AHS tableau

	MNCY SCN monitoring indicator	Comparable existing indicator in AHS tableau

1	Wait times for accessing community mental health services	• Client access times: percentage of enrolments who were offered an appointment with a therapist within 30 days of referral (removes client unavailable time from the calculation)
		    • Contact Seija Kromm if interested in this indicator
		
		• Completeness of the first appointment date offered - scheduled level of urgency
		    • Contact Seija Kromm if interested in this indicator
