## moreOB (Managing Obstetrical Risk Efficiently) QI teams & Education Platform

MNCY has recently renewed their contract for three years with Salus Global (SG) for the provision of an obstetrical education platform (SG Hub) and professional support for the labour & delivery moreOB site-specific QI teams, across the province.

SG is a proven patient safety partner with over twelve years' experience and expertise in interprofessional collaboration, teamwork and communication, and obstetrical quality and patient safety.

moreOB has been delivered in over 300 hospitals and to more than 16,000 participants over the past twelve plus years. The result is a significant reduction in adverse events, a measurable reduction in costs, and improved teamwork and communication across all disciplines.

moreOB provides local support to the moreOB QI team by an experienced SG – Client Success Partner who will provide a customized approach to enable enhanced goal setting, increased goal alignment, team engagement and advancement towards provincial obstetrical quality and safety. SG is a leader in the delivery of innovative solutions to help build stronger healthcare teams.

The SG Hub education platform is a self-customized obstetrical patient safety online platform designed to continue to meet the needs and goals of maternity services at all levels of the organization. This platform provides the tools and strategies for sustaining and building on the results achieved in the site-specific moreOB QI team.
