

# 2022-2023 PUBLICATIONS SUMMARY

In 2022-23, SCNs contributed to 438 peer-reviewed manuscripts & scholarly publications, including:

**345** with SCN leaders as a named author

**47** publications that received SCN in-kind and/or financial support

**46** submitted or in-press manuscripts

## SCN ROLE

SCN financial support (3%)

SCN in-kind support (9%)

**345 publications with SCN leaders as named author (88%)**

NOTE: Summary data is based on 15 SCNs and Provincial Programs. No data provided for 2022-23 FY from Provincial Population and Public Health.

## NOTES

1. SCN or Provincial Program leaders are contributing authors on all publications listed here unless otherwise noted.
  - Names of SCN or Provincial Program leaders are marked in **bold type**. They include the chief program officer (CPO), associate chief medical officer (ACMO), scientific director (SD), assistant scientific director (ASD), senior provincial director (SPD), senior medical director (SMD), executive director (ED), manager (MGR), and research scientist (RES SCI).
  - Patient and family advisors, student researchers, and trainees who have received SEED grants from the SCN or are members of the SCN Core Committee are marked with underlined type.
2. Where SCN or Provincial Program leaders are not listed as authors:
  - The study has been authored by scientists other than the SD or ASD who work within the Provincial Program and engage in scientific research, knowledge generation and innovation activity that supports the Program.
  - The SCN or Provincial Program has provided financial or significant in-kind support (e.g., data analysis) and this is noted in the citation.
3. Publications listed here include manuscripts submitted or published during the annual reporting period (April 1, 2022 to March 31, 2023). Publication status is noted for manuscripts that were accepted/in press or submitted by the end of the fiscal year.  
  
 Manuscripts listed as 'accepted/in-press' or 'submitted' as of March 31, 2023 are not counted in summary metrics (even if they have since been published). This approach avoids double-counting and ensures consistent year-to-year reporting. Grants, awards, publications and other achievements since March 2023 will be captured in next year's report.
4. Where publications include authors from multiple SCNs or Provincial Programs, the publication is counted only once in the summary metrics.
5. Each SCN or Provincial Program's publications are listed by year and then alphabetically by author surname.

This list includes peer-reviewed scholarly publications only. It does not include reports, evidence reviews, book chapters, guidance documents, grey literature or other types of knowledge products and deliverables. For information on non-peer-reviewed publications, see the [Other Outcomes & Deliverables Summary](#).

Further detail on performance indicators related to publications is provided in the [2022-2023 Impact Report, Appendix A](#).
