

Seniors' Health Priority Setting Partnership

Declaration of Interests for Individuals on the Steering Group

The James Lind Alliance strives to maintain a culture of openness and transparency among partners and requests that all Steering Group members declare any potentially competing interests through a Declaration of Interests statement.

Name: Heather Hanson

Declaring interests

Do you have any competing interests which could be seen as to influence your participation?
If yes, please describe and indicate how you will manage this.

I am a PhD trained researcher active in the field of gerontology. However, my involvement in the PSP will be bounded to the role of PSP Lead and Steering Group chair; I will not participate in the prioritization (voting/ranking) of the unanswered questions identified through the PSP.

Have you, or do you publicly declare, any strong opinions about treatment in the area of this PSP?
(Please include details of research interests.) If yes, please describe.

I participate in and publish research on the mobility of older adults (physical activity, prevention of injury/functional decline, and recovery of function) and knowledge translation. I also support the three broad priority areas identified in the Seniors Health SCN Transformational Roadmap (a) Aging Brain Care, b) Frailty, Resilience, Aging-well: Late-life Transitions Initiative (FRAILTI), and c) Anticipating an Aging Alberta) and provincially promote research in these areas as part of my responsibilities as Assistant Scientific Director.
