

2015-16 AHS Employee Influenza Immunization Rates

by Workplace Location

March 31, 2016

INTRODUCTION

Influenza Immunization is not mandatory for AHS employees. If an AHS employee chooses to be immunized, it is easy to do so. They can:

- (1) Visit a Workplace Health and Safety (WHS) clinics and/or Site Champion immunizer;
- (2) Visit an AHS Public Health Clinic; or
- (3) Visit a Pharmacy or Physician's Office.

Immunization status is recorded and reported back to AHS when the employee is immunized through WHS, Site Champions, and Public Health.

The following symbols will show each facility's influenza immunization rates.

- = 80% or higher
- ▲ = between 60 - 79.9%
- = 59.9% and below

Listed below are each organization's total number of employees and their influenza immunization rate as of March 31, 2016.

Immunization Rate for Alberta Health Services Employees

| Influenza Immunization Season | Rate |
|-------------------------------|------|
| 2013 – 14 | 60% |
| 2014 – 15 | 64% |
| 2015 – 16 | 61% |

Influenza vaccine has been shown to be an effective measure for reducing the risk of transmission of the influenza virus. Healthcare workers are at an increased risk of both being infected and infecting others. A better understanding of influenza coverage among staff at AHS will help increase the immunization rates for future years.

Note: Influenza vaccination is voluntary for health care workers. AHS employees can also consent or decline to report their immunization status to the organization.
