

50 ml and 500 ml BYD Alcohol-based Hand Rub Instructions for Use

50 ml Dispenser

1. Press down tab (A).
2. In a downward direction, **gently** squeeze bottle into palm of cupped hand. Apply an adequate amount of product and continuously rub all surfaces of hands until dry. This should take between 15 – 20 seconds.
3. Discard bottle when empty.

500 ml Dispenser

1. Turn spout (A) counter clockwise while holding the bottle top (B).
2. Press down dispenser pump (A) into palm of cupped hand. Apply an adequate amount of product and continuously rub all surfaces of hands until dry. This should take 15 – 20 seconds.
3. Discard bottle when empty.

Note: AHS has several new providers of alcohol-based hand rub. These products meet the [Health Canada requirements](#) for safety, effectiveness and quality and use the [World Health Organization](#) - recommended Handrub Formulations. These new products may look, smell and feel different from other products; they are effective in killing and preventing the spread of microorganisms. Product labels and styles of dispensing pumps may change over time.
