PPE to Transport Patients on Additional Precautions
Additional Information
<p>a. Always perform hand hygiene before and after transporting a patient. Use soap and water when transporting a patient on Contact & Sporicidal Precautions.</p> <p>b. If wearing PPE to prepare a patient for transport, discard the used PPE and perform hand hygiene before transport. Put on clean PPE for direct patient contact at the destination.</p> <p>c. If a patient on Droplet or Airborne Precautions is unable to tolerate a surgical mask during transport, consult Infection Prevention and Control.</p>
