

Respiratory Illness: Assessing the Need for Additional Precautions (Isolation)

****NOTE** Aerosol Generating Medical Procedure (AGMP)**
Any procedure that may induce production of aerosols from droplet nuclei, including:

- Intubation and related procedures (e.g. manual ventilation, open endotracheal suctioning)
- Cardio pulmonary resuscitation
- Bronchoscopy
- Sputum induction
- Nebulized therapy
- Bi-level Positive Airway Pressure (e.g. BiPAP)
- Respiratory/airway suctioning
- High frequency oscillatory ventilation
- Tracheostomy care
- Aerosolized medication administration
- Humidified high flow oxygen systems (e.g. ARVO, Optiflow)

When possible, perform procedures in a single room with the door closed

Refer to the Infection Prevention and Control Diseases and Conditions Table:
<http://www.albertahealthservices.ca/ipc/hi-ipc-resource-manual-main-document.pdf>

***Symptoms may differ from Influenza outbreak case definitions**
