

Process for Transfer, Admissions and Discharges in South Zone Outbreak Facilities

Select the type of facility where the patient/client/resident is **currently** located and the applicable scenario. If your situation is different than what is provided in this algorithm, please contact the appropriate Outbreak Contact (listed bottom right of this page). The IPC/EPH/CIPC outbreak lead will work with facilities to complete risk assessment. The algorithm below is applicable to MOH declared outbreaks when precautionary restrictions have been applied.
