- This instruction pamphlet

Call 811 to anonymously report kit usage and find out how to get a replacement. If you get Naloxone from your agency you got it from the agency you got it from to get a replacement. Call 811 to anonymously report kit usage and find out how to get a replacement. If you get Naloxone from your agency you got it from the agency you got it from to get a replacement. **SAVE A LIFE. THESE KITS CAN — do not take them away. If you see these kits a high. And cannot be abused. breathe. Naloxone does not cause an opioid overdose. (blocks the effects of opioids). Naloxone is an opioid antagonist Enforcment A Message to Law Enforcement.
OVERDOSE?

OPIOIDS (morphine, dilaudid, heroin, fentanyl, oxycodone, oxy)

Feels And Looks Like:
- Person cannot stay awake
- Can’t talk or walk
- Slow or no pulse
- Slow or no breathing, gurgling
- Skin looks pale or blue, feels cold
- Pupils are pinned or eyes rolled back
- Vomiting
- Body is limp
- No response to noise or knuckles being rubbed hard on the breast bone

TAKE CHARGE.

In Case Of Opioid Overdose:
- Stay with person. Use their name. Tell them to breathe
- Call 911 and **tell them person is not breathing. Start rescue breaths.** When paramedics arrive tell them as much as you can about drugs and dose
- Use naloxone if available. **Naloxone only works on opioid overdose**
- After naloxone a person might feel withdrawal. **Do not take more drugs. Sick feeling will go away when naloxone wears off (30 - 60 minutes).** Be aware: overdose can return

TAKE CARE.

SAVE ME

S Stimulation. Can you wake them up? If not, call 911
A Airway. Make sure there’s nothing in their mouth that stops them from breathing.
V Ventilate. Breathe for them. (Plug nose, tilt head back, and give 1 breath every 5 secs for 2 mins.).
E Evaluate. Are they any better? Are you trained to give naloxone?
M Muscular injection. Inject 1ml of naloxone into a muscle.
E Evaluate & Support. Is the person breathing on their own? If they’re not awake in 2 min, another 1ml dose is needed. Tell the person not to use any more drugs. This is proven to work.

ENSURE 911 IS CALLED OVERDOSE CAN RETURN WHEN INJECTION WEARS OFF.

Follow the SAVE ME steps below to respond.
If the person must be left unattended at any time, put them in the recovery position. The 911 operator may advise you to start CPR and talk you through it.

Stimulate
Unresponsive? CALL 911

Airway
1 breath every 5 seconds for 2 mins.
