About The Alberta Cancer Registry

The Alberta Cancer Registry is a population-based registry, established in 1942, that records and maintains data on all new cancer cases and cancer deaths occurring in the province. The Alberta Cancer Registry is operated by the Alberta Health Services-Cancer Care and is mandated by the Regional Health Authorities Act of Alberta.

In Alberta, information on new cancer cases and cancer-related deaths is recorded in the Alberta Cancer Registry. The Registry records information about the type of cancer, as well as personal information, such as name, date of birth, sex, provincial health care number and postal code.

The Alberta Cancer Registry is notified of new cancer cases by doctors and laboratories throughout the province. Cancer-related deaths are recorded by the Registry using information from Alberta Vital Statistics and Statistics Canada.

Confidentiality and security of personal information are protected by the Cancer Registry Regulation under Regional Health Authorities Act, Alberta Health Services policies, and the Health Information Act (HIA). The Alberta Cancer Registry maintains the trust of the patient, the government, the data provider, and the general public by requiring rigorous confidentiality and security practices to access the Registry database. Formal policies on information disclosure are available on request from the Alberta Cancer Registry.

By recording information on cancer cases and cancer-related deaths over the past few decades, the Alberta Cancer Registry has been able to compare cancer rates in Alberta with other provinces and countries. The Registry also shares data with health care providers throughout the province so that they can plan effective prevention, treatment and research programs. The registry data can also help identify Albertans who may be eligible for participation in research studies that have been approved by a Research Ethics Board as designated in the Health Information Act. These individuals may then be contacted by the Alberta Cancer Registry on behalf of the researchers.

The Alberta Cancer Registry is certified by the North American Association of Central Cancer Registries (NAACCR). Historically NAACCR has awarded Gold Certification for Alberta Cancer Registry's data based on the completeness of our data, timely reporting, and other measures that judge data quality. Certification for 2010 data is still under review.

If you require further information about the Alberta Cancer Registry, please contact our Cancer Registry offices in Edmonton or Calgary (pg 40).

2010 Annual Report of Cancer Statistics

Introduction

This report is produced by Alberta Health Services, Cancer Measurement Outcomes Research and Evaluation (C-MORE), Cancer Care, Surveillance and Reporting using 2010 Alberta Cancer Registry data. Surveillance and Reporting conducts ongoing, systematic analysis and interpretation of data collected by the Alberta Cancer Registry. Relevant cancer information, such as cancer incidence and mortality in Alberta, is disseminated to clinicians, researchers, oncologists, public health professionals and governmental organizations so that they can plan effective prevention, treatment and research programs.

If further information on cancer statistics is required, please contact Surveillance and Reporting, Cancer Care, Alberta Health Services (pg 40).

Highlights

- In 2010, there were 14,891 cases of cancer diagnosed in Alberta and 5,578 people died from this disease.
- The most common cancers in Alberta in 2010 were breast, prostate, colorectal and lung. These four cancers accounted for 54% of new cancer cases and 51% of cancer deaths.

Data

The numbers published in this report should be considered provisional, as a few 2010 cases and deaths will be registered in subsequent years. The data in this report reflects the state of the Cancer Registry as of July 31, 2012.

Methods for the coding of cancers and deaths from cancer have varied slightly through the years. For this reason, caution should be exercised when comparing this data to that of previous years.

The incidence and mortality rates presented in this report are based on Alberta Health population figures and are standardized to the World, US 2000 and 1991 Canadian standard populations (Appendix).

The incidence cases in this report represent new cases of cancer in Alberta residents. For example, to be included as an incident case, the person must have been an Alberta resident when diagnosed with cancer. The mortality figures in this report represent deaths due to cancer of Alberta residents, regardless of where they were when they died. For example, an Alberta resident dying of cancer while on vacation in British Columbia would be included in this report while a British Columbia resident dying of cancer while on vacation in Alberta would not.

Definitions and Explanatory Notes

<i>Age</i>	The age of the individual (in completed years) at the time of diagnosis or death.
<i>Incidence count</i>	The number of new invasive cases of a particular type of cancer diagnosed during the calendar year. For most sites, the basic unit of reporting is a new primary invasive neoplasm, not an individual person. For basal and squamous cell skin cancers and bladder cancer, only the first invasive cancer of a given histologic type is reported. In situ bladder cancer cases are excluded from bladder cancer incidence counts.
<i>Mortality count</i>	The number of deaths attributed to the particular type of cancer that occurred during the year.
<i>Primary site of cancer</i>	The tissue or organ in which the cancer originates.
<i>Cancer diagnosis site</i>	Cancers are currently coded according to the International Classification of Diseases for Oncology, Third Edition (ICDO-3) which classifies all tumours by site and morphology. The groupings used in this report closely follow SEER groupings for sites. Classification of morphology takes precedence over topography.
<i>Cause of death</i>	The underlying cause of death is coded according to the Tenth Edition of the International Classification of Disease (ICD-10). The groupings used in this report closely follow SEER groupings for sites.
Incidence and Mortality Rates	
<i>Age-specific rate</i>	The number of new cases of cancer or cancer deaths during the year expressed as a rate per 100,000 persons in a given age range. The population used in computing rates is from Alberta Health.
<i>Age-standardized rate</i>	A weighted average of age-specific rates using a standard population distribution. This reflects the overall numbers that would be expected if the population of interest had an age-structure identical to the standard population (1991 Canadian population) and are used to compare cancer rates among populations or identify trends over time. Rates are also standardized to the World and United States 2000 standard populations: consult the Appendix for more details. The Alberta population used in computing rates is from Alberta Health.

Appendix

Cause of Death

The Alberta Cancer Registry reviews the underlying and contributing cause(s) of death for all Albertans with a mention of cancer on the death certificate. If the cause of death is inconsistent with the person's last known condition further information is requested. Based on this information, the underlying cause of death is reviewed and may be coded on the Registry as different from that appearing on the death certificate.

Populations

Alberta 2010-Alberta Health			Standard			
Age Group	Females	Males	Age Group	World	US 2000	1991 Canada
0-4	122,600	129,200	0-4	12.0%	6.9%	6.9%
5-9	109,200	114,400	5-9	10.0%	7.3%	6.9%
10-14	111,100	117,200	10-14	9.0%	7.3%	6.8%
15-19	120,100	126,100	15-19	9.0%	7.2%	6.8%
20-24	135,600	135,500	20-24	8.0%	6.6%	7.5%
25-29	151,400	149,400	25-29	8.0%	6.5%	9.0%
30-34	140,300	141,200	30-34	6.0%	7.1%	9.2%
35-39	132,800	137,300	35-39	6.0%	8.1%	8.3%
40-44	130,800	133,800	40-44	6.0%	8.2%	7.6%
45-49	145,600	147,200	45-49	6.0%	7.2%	6.0%
50-54	137,800	142,700	50-54	5.0%	6.3%	4.8%
55-59	111,200	116,200	55-59	4.0%	4.8%	4.4%
60-64	88,000	89,000	60-64	4.0%	3.9%	4.2%
65-69	62,300	61,000	65-69	3.0%	3.4%	3.9%
70-74	48,500	45,200	70-74	2.0%	3.2%	3.0%
75-79	40,500	35,500	75-79	1.0%	2.7%	2.2%
