### Tammy Bungard, BSP, PharmD

- Associate Professor, Faculty of Medicine & Dentistry, Department of Medicine, Division of Cardiology, University of Alberta
- Research Affiliate, Glenrose Rehabilitation Hospital

Dr. Bungard initiated and continues to direct the Anticoagulation Management Service at the University of Alberta Hospital. Her research focuses on antithrombotic therapies. She has assessed patterns of practices with warfarin as well as with direct oral anticoagulants( DOAC's). Dr. Bungard has conducted practice-based research related to care delivery with warfarin

and molecular weight heparin. She has continued to publish articles that offer insight to antithrombotic management, often with practice tools. She is a member of Thrombosis Canada, and co-chairs the patient and families committee.

### Clinical Implications of Research:

Optimization of the care for patients requiring anticoagulant therapies by assessing baseline practices and then offering alternate solutions. Active in promoting good clinical practice by disseminating practice tools useful for the front-line clinician.
