

ELECTIVE CARDIAC SURGERY ROADMAP

STOLLERY CHILDREN'S HOSPITAL CARDIAC SCIENCES

THE PLACES YOU MAY GO, THE THINGS YOU MAY SEE

Your entry into the cardiac sciences program begins with a referral to the cardiology service. Once the cardiology service believes a surgical consult is necessary, the case is discussed at the WCCHN Surgical Conference, a multidisciplinary meeting. During this conference, all information including clinical context, parental preference, and imaging studies are reviewed. Once the decision for surgery is made, a surgical priority is assigned, and scheduling begins. No matter where your journey takes you, you will always be at the centre of the Stollery Circle of Care.
