

ACP/GCD – Proven Working Solutions: Visual Cues

Use visual cues in your environment and processes to prompt both health care providers, patients and their families.

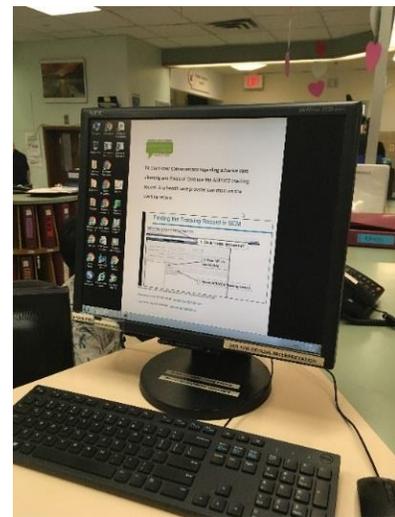

Here is a non-exhaustive list of ideas:

- Posters and Green sleeves in your patient or exam rooms
- Posters, booklets, tips of the month in your waiting rooms, patient rooms and staff rooms
- TV Announcements
- Shared Computer Screensavers

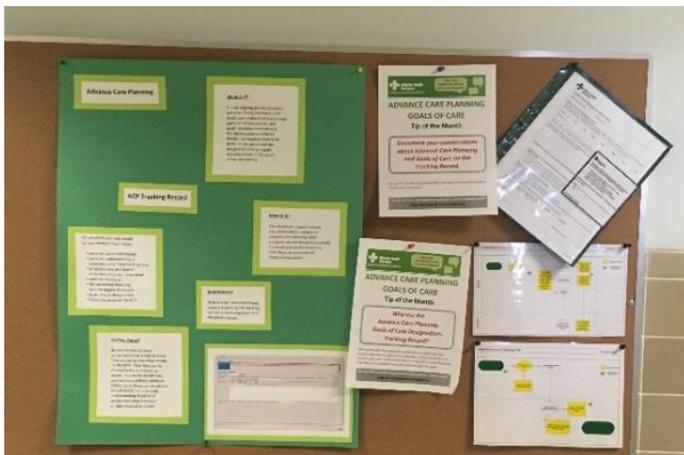

Be creative, keep the message up to date and change the visual frequently so it catches people eyes.

Outpatient Exam Room – Posters, booklets and Green sleeves
