

## How can I have more Advance Care Planning Conversations in my clinic?

- Put ACP GCD “Planning Your Care Together” posters in your waiting area and examination rooms
- Keep a Green Sleeve (with GCD order and ACP GCD Tracking Record) available in each examination room – it will cue HCP to start ACP GCD conversations and provides a take home Green Sleeve for the patient
- Encourage patients to view ACP GCD videos on [www.conversationsmatter.ca](http://www.conversationsmatter.ca)
- Play the ACP and GCD videos on your waiting room screen
- Introduce ACP (choosing and talking with their agent, preparing a personal directive) as part of health promotion in annual appointments
- Book separate appointments (20-30 min) specifically for GCD conversations when clinically indicated (e.g. you would not be surprised if this person would be hospitalized for serious illness or die in the next year )
- Add ACP GCD documentation to your Electronic Health Record to prompt the need for conversations
- Keep ACP GCD forms visible for all HCP to document : GCD order forms (the medical order) and ACP GCD Tracking Records (summarizes conversations)
- Work with your HCP team members to develop a verbal or written workplace process that prepares patients for ACP GCD conversations
-
