

# Safeworks Monthly Report – August 2021

## Supervised Consumption Services

September 15, 2021

### Background

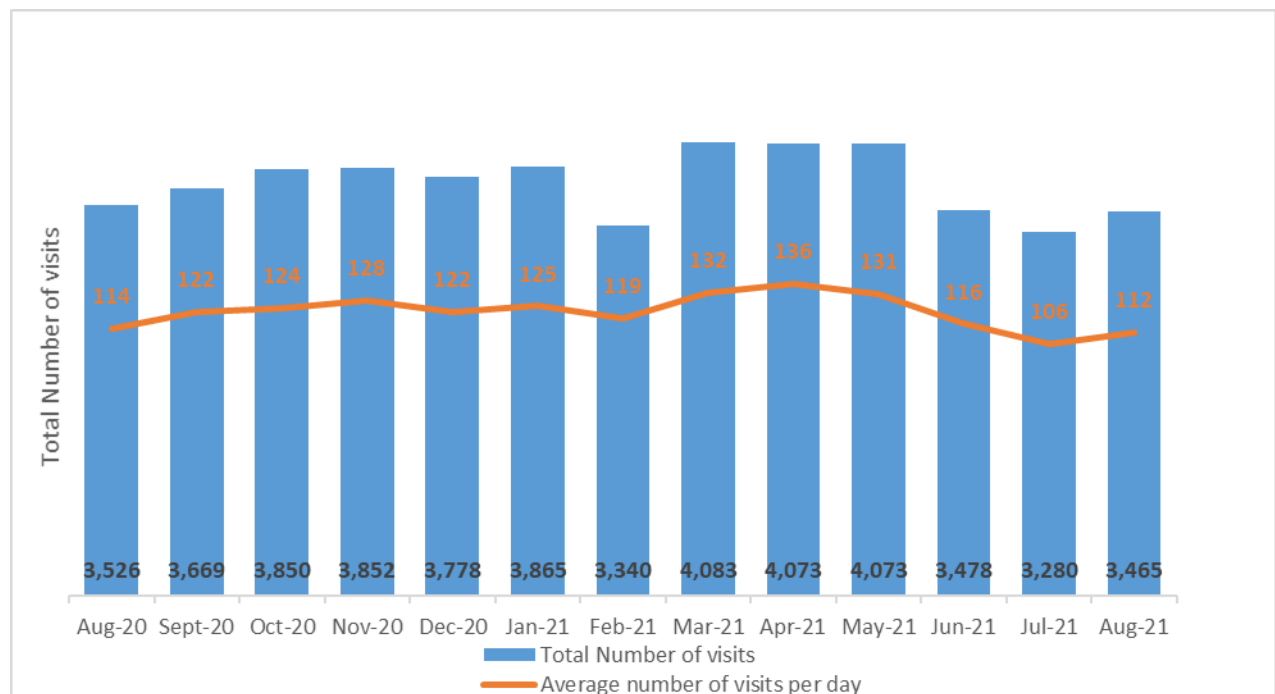

Safeworks Supervised Consumption Services (SCS) launched on October 30, 2017 in a temporary facility at the Sheldon M. Chumir Health Centre with a federal exemption to the Controlled Drugs and Substances Act from Health Canada. On January 15, 2018, the temporary facility closed, and the permanent facility inside the Sheldon M. Chumir Health Centre opened for operations. On April 30, 2018, Safeworks began offering services 24 hours, 7 days a week.

### Service Uptake

From the start of operations on October 30, 2017 to August 31, 2021, Safeworks SCS had **206,883 client visits**. In August 2021, the site saw **468 unique individuals in 3,465 visits** with an average of 112 visits per day.

Uptake of services recently declined during the spring COVID-19 response. In response to COVID-19 public health recommendations, Safeworks SCS decreased booth capacity from six booths to three booths on March 19, 2020. On July 20, 2020, booth capacity was increased back to six booths with the proper infection control measures in place. Due to the rise in COVID-19 cases in the fall, booth capacity was reduced again to three on November 10, 2020. On July 21, 2021, booth capacity was once again increased back to six booths.

## Drug Use and Overdose Prevention and Response

In August 2021, drugs were consumed on site under the supervision of registered nurses (RNs) or paramedics **2875 times**. With each client who uses drugs by injection, RNs and paramedics are available to provide education on vein care, infection prevention, and injection technique. In August, there was 200 instances of intranasal use (snorting).

The most frequently reported drugs used in August 2021 were fentanyl (1139 times) and methamphetamine (983 times).

Overdose response kits (containing Naloxone) and overdose prevention education are offered to all clients accessing Safeworks SCS. In August 2021, SCS staff distributed **273 overdose response kits**.

Since operations began on October 30 2017 to August 31 2021, Safeworks staff have responded to a **total of 3,219 overdoses**.

In August 2021, Safeworks staff responded to **131 overdoses**. Of these, 131 required supplemental oxygen and 19 required naloxone. None required an EMS response.
