

Safeworks Monthly Report – January 2023

Supervised Consumption Services

February 10, 2023

Background

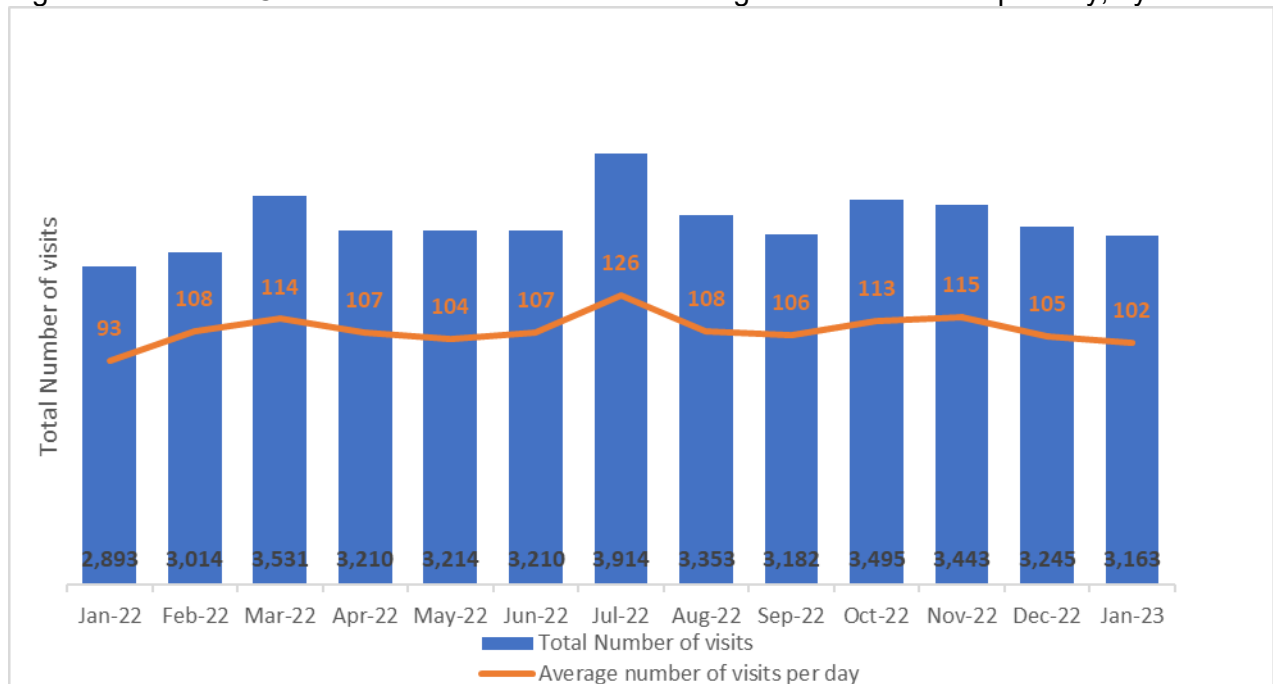

Safeworks Supervised Consumption Services (SCS) launched on October 30, 2017 in a temporary facility at the Sheldon M. Chumir Health Centre with a federal exemption to the Controlled Drugs and Substances Act from Health Canada. On January 15, 2018, the temporary facility closed, and the permanent facility inside the Sheldon M. Chumir Health Centre opened for operations. On April 30, 2018, Safeworks began offering services 24 hours, 7 days a week.

Service Uptake

From the start of operations on October 30, 2017 to January 31, 2023, Safeworks SCS had **262,226 client visits**. In January 2023, the site saw **519 unique individuals** in **3,163 visits** with an average of 102 visits per day.

Uptake of services declined in the spring of 2020, during the COVID-19 response. Safeworks SCS decreased booth capacity from six booths to three booths on March 19, 2020, following public health recommendations. On July 20, 2020, booth capacity was increased to the full complement of six booths with proper infection control measures in place. Due to the rise in COVID-19 cases in the fall of 2020, booth capacity was again reduced to three on November 10, 2020. On July 21, 2021, booth capacity was once again restored to six booths and continues to operate at that capacity.

Drug Use and Overdose Prevention and Response

In January 2023, drugs were consumed on site under the supervision of registered nurses (RNs) or paramedics **2624 times**. With each client who uses drugs by injection, RNs and paramedics are available to provide education on vein care, infection prevention, and injection technique. In January, there was 278 instances of intranasal use (snorting).

The most frequently reported drugs used in January 2023 were fentanyl (981 times) and methamphetamine (911 times).

Overdose response kits (containing Naloxone) and overdose prevention education are offered to all clients accessing Safeworks SCS. In January 2023, SCS staff distributed **151 overdose response kits**.

Since operations began on October 30 2017 to January 31 2023, Safeworks staff have responded to a **total of 5,469 overdoses**.

In January 31, 2023, Safeworks staff responded to **137 overdoses**. Of these, 137 required supplemental oxygen, 43 required naloxone and 2 required an EMS response.
