

Online Resources about Liver Cancer

Liver cancer starts in the cells of the liver. This type of cancer is called hepatocellular carcinoma (HCC). The liver is part of the digestive system and is located in the upper right side of the abdomen, below the lungs. Sometimes, cancer can also start in the cells of the bile ducts inside or near the liver. This type of cancer is called cholangiocarcinoma, or bile duct cancer.

Being diagnosed with liver cancer can be life-changing. **But you are not alone.** Getting facts, support and information from trusted websites can help.

Open a digital copy of this resource by:

- Scanning the QR code with a smartphone camera
- Typing into your trusted website browser:
 - bit.ly/liver_ca, or
 - cancercarealberta.ca, select 'Information for Patients & Families', select 'Just Diagnosed', select 'Types of Cancer', select 'Liver'
