

Sexual Health and Cancer

We can help!

Support and Counselling

**Sexual health
information and
support for cancer
patients and
families**

Cancer patients may have sexual health concerns, such as:

- Vaginal discomfort or dryness
- Erectile dysfunction
- Hormonal changes
- Anxiety or fear related to sexual activities
- Body image
- Less interest in sex
- Difficulty with arousal or orgasm
- Relationship changes

Try these resources or programs:

1 Sexual health information
