

CCA Strengthening Indigenous Cancer Health Together Microlearning Modules for Cancer Care Teams

Cancer Care Alberta (CCA) is committed to reconciliation. Together we can strengthen Indigenous cancer care by reaffirming and enhancing our knowledge and actions around providing safer, more welcoming and supportive cancer care.

Microlearning modules are built to help busy teams get meaningful information and actions they can try in their work. Each module is easy to do as a team in 15 minutes or less. Individual care providers can access the modules too.

Modules are listed below. We will add new modules as they are ready.

Open modules by clicking on the title.

Module 1 - [There are many different Indigenous peoples living in Alberta.](#)

Module 2 - [CCA is committed to strengthening Indigenous cancer care in Alberta!](#)

Module 3 - [Spirituality and Traditional Ceremony are important in cancer care.](#)

Module 4 - [Trauma and Violence Informed Care is safer care.](#)

Module 5 - [Distinctions-based resources are available to support Métis people in Alberta.](#)

Module 6 - **Coming soon!**

Module 7 - [We make our care spaces safer and more welcoming.](#)

Module 8 - [Partnering with patients can emphasize strengths, overcome challenges and support their cancer care!](#)

Module 9 - **Coming soon!**

We welcome your feedback.
