

Connect Care Newsletter

Calgary Zone Medical Staff Newsletter - September 2018

Connect Care Update

Now that preparations for Connect Care are well underway, we will start to communicate more information on the project and what the implications for physicians are. We will inform you using this newsletter and send more specific information to your departments.

Curious to learn more about our partner, Epic Systems, and how its software is working in other organizations? All AHS staff are able to easily join Epic's online community, [Epic UserWeb](#). Although the information in the community isn't about Connect Care itself, it does offer a sense of what's happening with other Epic projects through educational material, discussion forums, and events and webinars. Anyone in AHS can create [an Epic UserWeb account](#) using an AHS email address.

Some additional resources to help keep you informed about Connect Care.
