

Important Information for Primary Care and Community Providers related to the impact of Connect Care

Connect Care Identifiers

Please retain this information for your records

Wave 3 of Connect Care will launch at select sites in the Calgary and North Zones on Saturday, February 27th, 2021.

What do I need to do?

All community providers in Alberta need to take action so that laboratory, diagnostic imaging, and other investigation results and reports are delivered to your office. As soon as you receive notification from Alberta Health Services (AHS), you need to:

- Use Connect Care identifiers on requisitions
- Use updated requisitions to order laboratory tests and diagnostic imaging

What are Connect Care Identifiers?

AHS is sending new Connect Care identifiers (IDs) to community providers across Alberta who order laboratory tests, diagnostic imaging (DI) and other interventions. Many providers may already have received and be using one or more of the following identifiers.

Please start using Connect Care IDs as soon as you receive them. Please continue to also include non-Connect Care IDs on requisitions, in addition to your Connect Care IDs.

Connect Care Provider ID: A single ID that identifies the ordering provider regardless of their location

Connect Care Department ID: Identifies the location where diagnostic imaging is ordered from

Connect Care Submitter ID: Identifies the location where laboratory tests are ordered from

Please email ccproviderbridge@ahs.ca with questions about these IDs.

Are there new laboratory and diagnostic imaging requisitions?

In early 2020, Alberta Precision Laboratories (APL), DynaLIFE and AHS Diagnostic Imaging (DI) have introduced new requisitions that include space for Connect Care and other non-Connect Care (legacy) healthcare identifiers.

When will I receive my Connect Care identifiers if I use eDelivery?

If you receive lab, DI and other reports via eDelivery, your Connect Care IDs should already be loaded in your EMR. Clinics affected by Connect Care Wave 3 may also receive an email from AHS eDelivery to confirm which providers work at that location. If your EMR is missing your Connect Care IDs, please contact your EMR vendor for support.

When will I receive my Connect Care identifiers if I receive results by fax or courier?

If you receive lab, DI and other reports via fax or courier, Connect Care IDs are being mailed in a staged manner to providers across Alberta. Some providers, including those in the Edmonton and North Zones, may already be using identifiers. We appreciate your understanding if you receive this information a second time.

- **Provider IDs** (grouped by clinic/location): will be mailed to all ordering providers in Alberta.
- **Department IDs:** will be mailed to clinics across the province.
- **Submitter IDs:** will be mailed to the former Peace Country region.

Expect these letters to arrive in late 2020. Providers in some parts of Alberta will receive their submitter IDs at a later date, in alignment with the [Connect Care implementation waves](#). More information will follow.

I am a short-term locum physician. What do I need to do?

If you are a short-term locum physician who works at a clinic using eDelivery, you **must** order under the provider you are covering until you are registered with eDelivery, in order to ensure successful result delivery.

I practice at a community clinic, but I also work at an AHS facility. What do I need to do?

Community orders will need to use Connect Care IDs to ensure that labs and DI ordered in your community practice return to the correct location.

I am interested in eDelivery. How do I sign up?

If you provide care at a location that uses a community-based EMR (e.g., Wolf, PS Suite, MedAccess, Accuro, Healthquest, Juno, etc.), then you are eligible to have lab and DI results delivered electronically to your EMR.

Visit [eDelivery](https://www.albertahealthservices.ca/info/Page15302.aspx) (<https://www.albertahealthservices.ca/info/Page15302.aspx>) to learn more about signing your clinic up for eDelivery.
