Introduction The Training Course Catalogue outlines Connect Care roles, role descriptions and associated training requirements including e-learning and instructor led course time.

Individuals can search this document to identify relevant roles for their students and their teams to better understand the training requirements.

Locate the roles that apply to you or your students.

View the Required Classroom Course(s) and eLearning Course(s) column to identify which courses you or your student must take.

Important: Instructor Led Class Length: The description of each course • eLearning length: The approximate length of the eLearning portion of the associated course • eLearning Course(s): List of eLearning course(s) associated with each role, to be completed in sequence prior to attending the associated instructor led class course. End User Proficiency Assessment(s): The EUPA(s) that will be required upon completion of training. These will be completed during the instructor led training class.

Note that the “InfoCare on Our Best Behaviours” eLearning course must be completed before a learner can access their EUPA in class.

Glossary Guidelines

Choose most appropriate roles for your students

AMH: Addiction Mental Health

AMB: Ambulatory

ILT: Instructor Led Training
