Frequently Asked Questions

What is Workflow Dress Rehearsal (WDR)?

- Workflow Dress Rehearsal is a multidisciplinary event that provides hands-on practice with simulated workflow scenarios, using a copy of the Connect Care production environment (RELN). Training must be completed prior to WDR event participation and WDR is an opportunity to assess End User readiness. During WDR we are able to determine how well End Users understand their new workflows and identify which users, workflows, or features might need additional support and training. WDR is also a great opportunity to test and reinforce issue documentation and ticket resolution strategies.

How to I register for Workflow Dress Rehearsal?

- WDR is using a web-based process for registration. Follow the link beside the session you are interested in attending, select the applicable role, and fill in the required information (name, email, and confirmation of role). If you have made a mistake during registration, please add a comment beside the role name. This will alert our Project Team to make the required updates. Anyone can view the registration and see how many spots are left for each session. Managers or their delegates can register on their behalf of participants, or individuals are able to register on their own.

If my site isn't offering a session I am interested in, or all the roles are filled, is there another option to participate?

- Yes, there is a 'Virtual Viewer' option for all sessions, with the exception of the Patient Access Virtual event. Should all of the Patient Access sessions fill, we will consider additional dates and times. For all other sessions, as a 'Virtual Viewer' you may not be able to practice in RELN, but you will be able to view the workflow and ask questions.

Connect Care

Workflow Dress Rehearsal

What happens if my area can't participate? What does that mean for our unit?

- It would be a great benefit to have every area involved, however, we understand staffing and patient workload might be a concern. All staff are encouraged to work on the scenarios provided during training in a practice environment. Workflow Dress Rehearsal provides assisted practice that highlights the integrated pieces of Connect Care workflows.

What type of support will be available for the event?

- There will be a Super User scheduled into each session to address questions as well as a CORE Lead on the line. Each session will also have a facilitator to assist with the logistical pieces (room access, devices powered on, etc.) There will also be virtual IT support and other resources to ensure this event is successful for you and your staff.

Why are some of the roles listed in this document not available on the registration page?

- Due to varying room capacity at each site, and strict COVID restrictions, slight modifications may have been required. Please consider viewing the session virtually if you are unable to attend in person.

Will I receive a calendar invitation to the session that I signed up for?

- Yes, you will receive a calendar invite within two business days of registering. The calendar invite will include the room location for in-person attendees, as well as the Zoom or Skype link for those that are registered as 'Virtual Viewers.'

***Please note, some sessions will require staggered start time, due to room capacity.**
