Overview

Connect Care Area Trainers (ATs) are users of the Connect Care clinical information system (CIS) in one or more areas of clinical specialization. Area Trainers support peers (in their own or similar clinical area or specialty) in safe and acceptable CIS use while promoting transformation and clinical improvement.

Accordingly, they work closely with zone medical leadership and co-report to relevant Associate Chief Medical Information Officers (ACMIOs). It is possible for Physician Design Leads, MILs, other physician roles or physician contributors to extend their Connect Care commitment by adding an Area Trainer role for a larger overall FTE allocation.

Area Trainers are guided by CMIO Provincial Training team who have provincial scope and responsibility for design of curriculum content that can be adapted to clinical area and facility needs.

[AHS is recruiting for Area Trainers to train Cancer Care physicians for the Connect Care launch on May 14, 2022.](#)

We are looking to hire approximately 10 Area Trainers in the areas Medical Oncology, Radiation Oncology and Hematology. Training will be delivered in person in Edmonton and Calgary, and will also be offered virtually. Training will take place from February to April, 2022

Expectations

Area Trainers should be interested in training their physician colleagues and contributing to the further refinement of physician training.

Getting Trained: (64 hours compulsory)

Area Trainers will receive training specific to their role to develop proficiency with Connect Care and to facilitate productive communications and interactions. Additionally they will participate in teach backs as preparation for training delivery. Training will begin in October 2021.

Delivering Training: (60 hours est)

Area Trainers will train Connect Care Super Users for their roles as well as delivering formal Connect Care training to End User physicians including basic training, personalization and optimization.

Launch Support: (36 hours est)

Area Trainers will have the opportunity to be a key part of launch support due to their extensive knowledge of the system and experience in training colleagues. Launch support will consist of the following:

- Providing implementation support split between scheduled days and ad hoc.
- Designing and deploying just-in-time user support to address issues arising during CIS launch waves.

Hours and compensation may differ for Area Trainers who work more or less than the 60 hours supporting the training of others and the 36 hours of Launch Support. Flexibility in the role can occur at the discretion of medical leadership.

Compensation

Funding will be discussed on a case by case basis based on the existing relationship with Cancer Care Alberta

How to apply

If you are interested in becoming an Area Trainer, please email your CV and letter of intent to mip@ahs.ca.
