<i>More Information</i>	<a href="#">Edmonton Zone Physician website</a>

### Overview

Connect Care Area Trainers (ATs) are users of the Connect Care clinical information system (CIS) in one or more areas of clinical specialization. ATs are trained and supported to instruct and support peers (in their own or similar clinical area or specialty) in safe and acceptable CIS use while promoting transformation and clinical improvement.

Accordingly, they work closely with zone medical leadership and co-report to the Edmonton Zone Associate Chief Medical Information Officers (ACMIOs). It is possible for Physician Design Leads, MILs, other physician roles or physician contributors to extend their Connect Care commitment by adding an AT role for a larger overall FTE allocation.

ATs are guided by CMIO Provincial Training team who have provincial scope and responsibility for design of curriculum content that can be adapted to clinical area and facility needs.

### Specialties

AHS is recruiting for ATs in the following specialty/clinical areas:

- Ambulatory
- Anesthesiology
- Cardiac Sciences
- Inpatient Admitting (including General Internal Medicine; Medicine Subspecialties; Hospitalists; Family Medicine)
- Lumens
- Surgery (including General Surgery and Surgical subspecialties)

### Expectations

ATs should be interested in training their physician colleagues and are excited to positively contribute to the further refinement of physician training.

#### Getting Trained:

ATs will receive training specific to their role to develop expert-level proficiency with Connect Care and to facilitate productive communications and interactions with End Users. Training is composed of in-class and self-guided e-learning. Additionally, ATs will participate in teach backs as preparation for training delivery. Training will tentatively start May 2021.

#### Delivering Training:

ATs will train Connect Care Super Users for their roles as well as delivering formal Connect Care training to End User physicians including basic training, personalization & optimization.

#### Launch Support:

ATs will have the opportunity to be a key part of launch support as Super Users due to their extensive knowledge of the system and experience in training colleagues. Launch support will consist of the following:

- Providing implementation support split between scheduled days and ad hoc.
- Designing and deploying just-in-time user support to address issues arising during CIS launch waves.

There will be an opportunity to extend the role to subsequent waves of Connect Care in the zone.

### How to apply

Please email your CV, letter of intent and a copy of your CPSA Practice Permit to [CMIO.EZ@albertahealthservices.ca](mailto:CMIO.EZ@albertahealthservices.ca). Make sure to specify your position of interest.
