| C = Compliant | | | | | | | |
| X = Not Compliant | | | | | | | |
| N/A = Not Applicable | | | | | | | |

| Requirement | С | X | N/A | Comments/Follow-up plan/Action | Person responsible for follow-up action | | | |
|--|---|---|-----|--------------------------------|---|--|--|--|
| FRIDGE | | | | | | | | |
| Dedicated electrical outlet | | | | | | | | |
| Power supply protected: plug labelled "Do Not Unplug" | | | | | | | | |
| Only vaccines stored in fridge | | | | | | | | |
| Sites with \$5000 or more of vaccine: lab grade fridge | | | | | | | | |

| Requirement | С | X | N/A | Comments/Follow-up plan/Action | Person responsible for follow-up action |
|--|---|---|-----|--------------------------------|---|
| TEMPERATURE MONITORING | | | | | |
| Current temperature:°C | | | | | |
| Min/max thermometer present | | | | | |
| Min/max thermometer properly installed | | | | | |
| Thermometer certificate of calibration showing calibration within at least ± 1°C | | | | | |
| Vaccine temperature recording chart posted on fridge | | | | | |
| Recorded temperatures are between +2°C to +8°C | | | | | |
| Temperatures are recorded twice daily | | | | | |
| Minimum, maximum and current temperature recorded | | | | | |
| Thermometer is reset after each reading | | | | | |
| Thermometer is calibrated/replaced annually (documentation) | | | | | |
| Sites with more than \$5000 of vaccine: continuous temperature monitoring device (data logger or chart recorder) present | | | | | |
| Sites with more than \$10,000 of vaccine: alarms monitored 24 hours/day, 7 days a week | | | | | |

| Requirement | С | Х | N/A | Comments/Follow-up plan/Action | Person responsible for follow-up action |
|--|---|---|-----|--------------------------------|---|
| ORGANIZATION INSIDE FRIDGE | | | | | |
| Vaccines stored in middle of fridge, away from walls, vents | | | | | |
| No vaccine in fridge door/bins | | | | | |
| Water bottles used where small amounts of vaccine are stored and for domestic fridges in door and bins | | | | | |
| Vaccines is placed with earliest outdate at front | | | | | |
| No expired vaccines in fridge | | | | | |
| Vaccines kept in original packaging | | | | | |
| Vaccine supply in fridge is appropriate (one month supply) | | | | | |
| REQUIRED DOCUMENTATION | • | | • | | |
| Written protocols for vaccine cold chain management | | | | | |
| Written protocols for emergency response to cold chain issue | | | | | |
| Written protocols for receiving, storing, unpacking, packing and transporting vaccine shipments | | | | | |
| Annual fridge maintenance complete and recorded in logbook | | | | | |
| Fridge temp logs kept for 1 year | | | | | |

| Requirement | С | Х | N/A | Comments/Follow-up plan/Action | Person responsible for follow-up action | | |
|---|----------------|---|-----|--------------------------------|---|--|--|
| TRANSPORTATION | TRANSPORTATION | | | | | | |
| Process in place to use appropriate packing materials to maintain cold chain during transport to another location | | | | | | | |
| Vaccines are packed for transport taking into account seasonal external temperature, length of trip, etc. | | | | | | | |
| Temperature is monitored during transport with appropriate temperature monitoring device | | | | | | | |
| EDUCATION | | | | | | | |
| Staff receive appropriate training (orientation and annually) | | | | | | | |
| Name of facility / Office member completing audit: Date: | | | | | | | |
