

**Five principles** guide the AHS HH Program – these principles and their actions for the 2021/22 year include:

- Leadership:** work to develop new tools for unit management in supporting hand hygiene reviewers
- Education:** digital signage to promote HH for visitors and staff, the “Clean your Hands” and “Global Handwashing” day events
- Product availability:** resolution of product supply disruptions and a return to usual inventory.
- Monitoring and feedback:** compliance rates have remained stable, however work is happening to support all units in providing hand hygiene observations
- Accountability:** embedding hand hygiene opportunities in the PPE Safety Coach guidance
